Greetings from

School of Planning and Development

It gives us immense pleasure to share our SEPTEMBER newsletter with you .

This edition will give you a glimpse of our two days mega event on 12th and 13th of August 2021 on “**Educational metamorphosis**”.

Day 1: SU students’ shared their experiences of online learning, the pedagogical shift, and the changing skill sets in their profession, its impact, and their expectations from the new system of education.

Day 2: Various experts: academicians, industry professionals, and bureaucrats will address the views and concerns raised by these student representatives.

HAPPY READING!!

Mr. Ken Marshall (Founder and Executive Producer, Climpatico Studios, San Francisco, USA)

Dr. Kaustub Bandyopadhyay (Director, Participatory Research in Asia (PRIA), New Delhi, India)

YOUTH CONCLAVE 2021

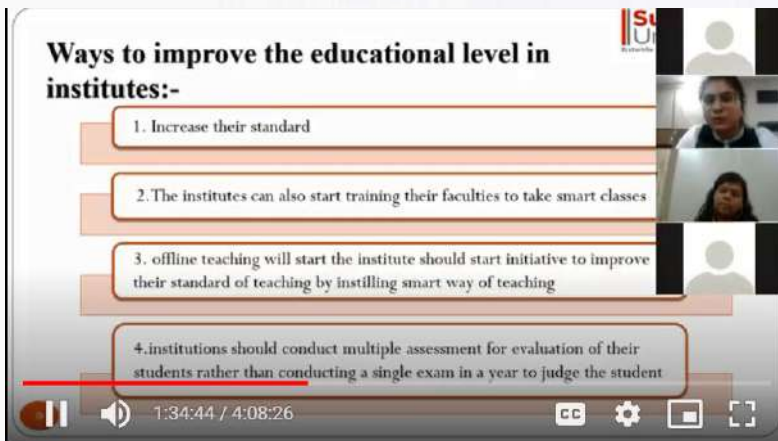

School of Planning and Development, Sushant University organized the first-of-its-kind 'Youth Conclave' on August 12, 2021 in a virtual mode.

The 'Youth Conclave' is an educational platform designed for students & curious learners from various disciplines across the Sushant University.

The vision of the conclave is to bridge the gap between academia by exploring, innovating, and sharing knowledge & Practices between students.

This platform intends to discuss traditional & contemporary issues and promote the students' sense of belonging in the academia.

Focusing on the development of Students through accessibility to widen exposure, practical approach, technological tools, trends, and the practices of the industry.

CONCLAVE 2021: EDUCATIONAL METAMORPHOSIS

School of Planning and Development, Sushant University organized the first-of-its-kind academia and practitioners led 'Conclave 2021: Educational Metamorphosis', to raise public awareness and initiate an argument on the aspects and prospects of Urban Planning pedagogy during the Post-Covid world.

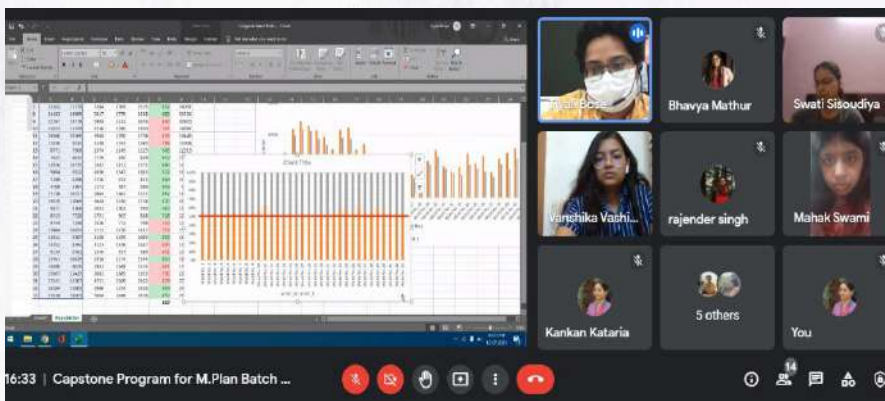

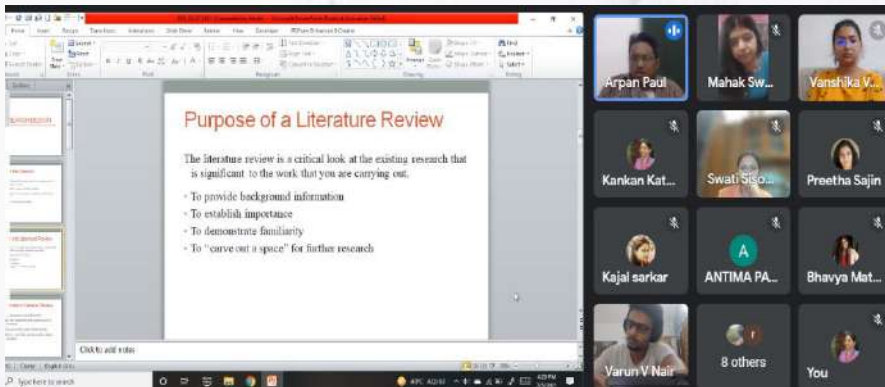

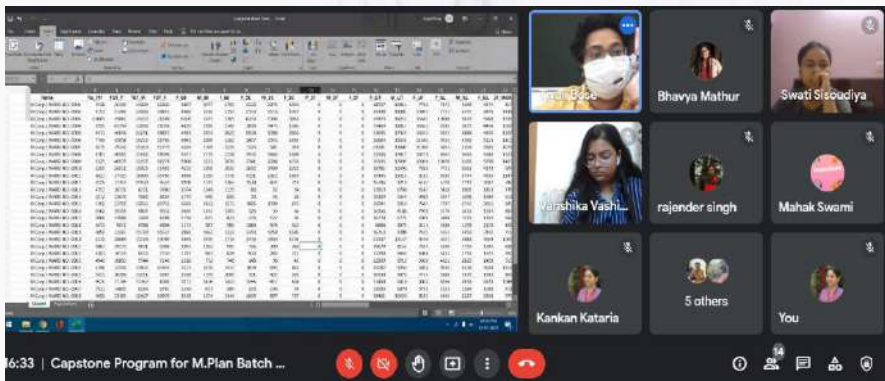

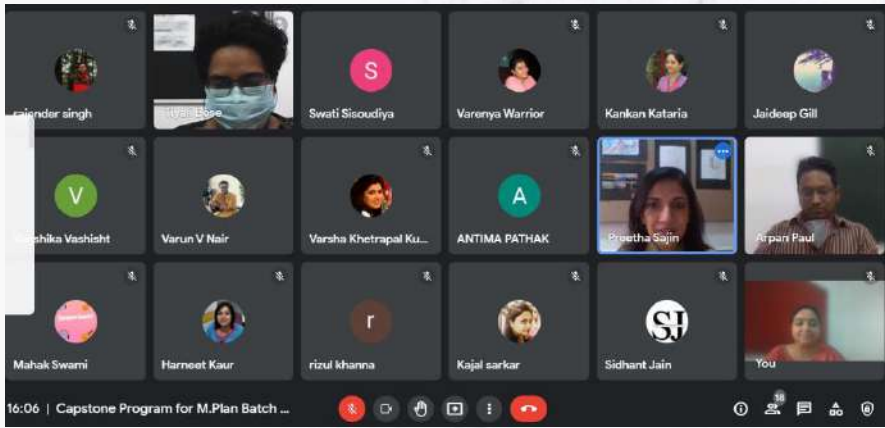

The expected outcome of this event is to create a cadre of informed academicians and students as agents of change for sustainable urban development, fostering the Smart city revolution in India. The event saw participation from 100+ candidates, representation from 15 academic institutions and 11 organizations both government and private working in the areas related to urban development.

SPD EVENT

CAPSTONE-2021

School of Planning and Development, Sushant University started the new academic session of First Year M Plan in Urban Planning and M Plan in Transport Planning, with four Weeks Bridge Program entitled as 'CAPSTONE' from 23rd August to 24th September, 2021.

The purpose of this four weeks' 'CAPSTONE' is to make students aware of some essential tools and skills. The sessions planned during this period include MS Office, Google Forms, e-mail writing, fundamentals of AutoCAD and Revit and basics of Geographic Information System (GIS) in Urban Planning.

This 'CAPSTONE' seeks to improve students' persistence in university and make a mark in this competitive world.

SPD EVENT

ADVISORY COUNCIL MEETING

School of Planning and Development, Sushant University organized Advisory Council Meeting to enhance the B. Plan and M. Plan syllabuses according to the industrial essentials on 24th August, 2021. The invited advisory council members were Dr. PSN Rao (Director, School of Planning and Architecture, New Delhi), Mr. Vikas Jain (President, Gurgaon Chamber of Commerce and Industry, Gurugram, and Mr. Shrinivas Kowligi (Advisor, MoHUA, GOI). At this meeting, the major agenda for discussion were:

1. Events organized by the School during the last academic session
2. Presentation of Programme Handbook for B. Plan, M. Plan and PhD programmes
3. Admission strategy for B. Plan and M. Plan (Integrated) programme
4. Strategy for improving placement

Congratulations..

SPD congratulates Ms. Garima Munjal and Ms. Ellora Ghosh for successfully completion of their internship with Cities Forum UK and Dronah Foundation and published their researches in the form of Project Report with the respective organizations. We wish them heartfelt congratulations and best for their next adventure!

Coinciding with the 75th year of India's independence, Delhi, the capital city of India, has published the Draft Delhi 2041 Master Plan (MPD 2041) for public consultation. The MPD 2041 sets the direction of growth for the city in the next twenty years and is especially relevant to take an informed view on the future of the second largest urban agglomeration in the world after Tokyo. The MPD 2041 document mentions the base year population of 20.6 million, which is forecasted to multiply 1.5 times to 30 million by 2041.

It appears that the MPD 2041 is built on a trend-based population growth forecast model rather than setting the plan based on a strategy-driven growth forecast. It is interesting to remark that some references suggest that Delhi Urban Agglomeration's population is currently around 30 million. A holistic view of the urban agglomeration could have presented a better view while drafting the growth agenda for such a large city (Region).

Looking at the document's structure, it seems the MPD 2041 tries to align with the national-level sustainable urban development policies. With a vision to foster a sustainable, liveable, and vibrant Delhi, MPD 2041 seems to identify the issues at the core but still needs details on implementation strategies for the visions and priorities set out in the document.

Standing on the three pillars of economic viability, environmental protection, and social equity, the plan considers the city's cultural, social, and economic differences, including the unauthorised colonies, high

land prices, power consumption, water scarcity, and mobility hindrances. The goals for 2041 are to become environmentally sustainable, future-ready, and a dynamic place for economic, creative, and cultural development.

The utopian vision

The vision document incorporates all the essential characteristics of a resilient city. It is public centric and based on inclusivity, equity, and sustainability, emphasising ease of mobility. The document has holistically covered the existing, upcoming, and anticipated drivers of urban regeneration and development. How far the authorities could implement these strategies would be interesting to note.

The MPD 2041 also focuses on delineating "The Green Development Area", a combination of a Green Belt (a planning strategy inspired by London) to create a regional environmental buffer and Low-density residential areas in urban villages. The primary objective in this zone is to foster city-level hubs for green living and recreation. The efforts taken as part of the 'green development' such as supporting urban farming, reducing pollution, and rejuvenating natural assets also promote the city's goals for environmental sustainability. Since the Green Belt is likely to create a regional environmental buffer, the plan highly encourages the production of food and other natural produce to meet the horticultural needs of the city. The belt may also act as a regional level pollution sink. As
