<b>Server Software</b>	JDK 1.7
<b>Browser</b>	Mozilla Firefox (recommended), Google Chrome

## Hardware Requirements

<b>Memory (RAM)</b>	1 GB (minimum), 4 GB or more (recommended)
<b>Network Infrastructure</b>	Internet speed 5-6 MBPS minimum (recommended)

## Display settings

Go to:

1. Windows 10, select Start > Settings > Ease of Access > Display.

The screenshot displays the Windows 10 Settings application. On the left, the 'Ease of Access' category is expanded, and 'Display' is selected. The main window shows the 'Display' settings page. Under 'Make text bigger', there is a text input field with 'Sample text' and a slider. Below it, the 'Make everything bigger' section is highlighted with a red arrow; it includes a dropdown menu set to '100% (Recommended)'. The 'Make everything brighter' section at the bottom features a brightness slider set to 100%. On the right side of the window, a 'Related settings' panel lists various options like 'Additional display settings', 'Background settings', 'Color settings', 'Theme settings', 'Help from the web', 'Turning on high contrast', and 'Using color filters'.
