HALL OF FAME

Hello dear readers...

Welcome to yet another episode into the lives of our VATEL FAMILY! The last few months have been a crazy journey. As mercury hits the bottom, our passions at VHTBS knew no bounds. This issue is dedicated to each hospitality passionate who not only wants to learn but also strives to become part of the evolutionary journey of the hospitality sector...

From the Dean's desk...

As I welcome my dear students and the readers of HOSPITIUM to the exciting and the rapidly growing world of hospitality, I wish to declare that our endeavour will always be, besides giving to students all the essential pedagogical inputs within the classrooms, laboratories and restaurants of the college's premises, also allow them several opportunities to get a hands-on exposure in the trade at hotels and service establishments of repute within the country and abroad.

We will equally make sure that these students groom themselves as pleasing personalities, indeed with the attributes of true, qualified and professional hoteliers. We at the Vatel Hotel & Tourism Business School firmly believe in the fact that our students, by virtue of their multi-faceted exposure at the VHTBS, will also understand and appreciate the cultures, values and philosophies of peoples from the different parts of the world.

I convey my best regards to all...

From the Editor's pen...

French philosopher René Descartes said, “Je pense, donc je suis”- an expression that throws light on the immense capability of human brain to not just learn, but also to produce novel ideas, researches and innovations, thus giving birth to ‘KNOWLEDGE’! This consistent rumination within human brain is seen as synonymous to human existence.

This volume of HOSPITIUM thereby is primarily dedicated to the celebration of this very process of ‘creation of knowledge’. VHTBS, an institution with unwavering dedication to hospitality and tourism industry, offers multiple vistas of opportunities for the budding hoteliers to not just acquire the theoretical wisdom and practical skillset but also to contribute immensely to the evolution of the industry by orchestrating a diverse range of events – colloquiums, conferences, awareness drives etc. This newsletter presents a glimpse of this colourful journey towards knowledge creation! Via this issue, we wish all the readers to witness this collective celebration of creation at our ‘Vatel family’ and extend their warmth and support to the same...

Happy reading!
