**March 1972**

**On 26 th an incident happened in India which resulted in starting of a very serious issue and issue we are not comfortable to speak about an issue we feel very pity about but also an issue we put on the victims , start with eve teasing when a guy comment on someone a girl is said to stay inside to protect herself but a guy is not told to not say or do any disrespect to anyone be it a boy or a girl**

**This issue not only happened with a particular gender or in-fact not only with humans but also with animals**

**A victim not only suffers with pain but with anxiety and affects done by society they feel inferior**

**Suffering from very bad comment itself is difficult some people can say it very easily and run away some people can say because you're dressed up in a way that allows them to say it like that , this thought itself is a crime is a shame that we should stand up for and also it makes people very uncomfortable to even talk about it how uncomfortable it is to feel**
