

Department Name	MRIT
Name of Event:	World Radiology Day
Date of Event:	6 November 2023
Venue :	D-421, Sushant Auditorium
No. of Participants:	Total Participants: 60
Participants:	Students and faculties of SHS, different colleges students and faculties.

Introduction:

The Department of Medical Radiology and imaging Technology at Sushant University hosted a highly World Radiology Day The event served as a significant platform for radiology professionals, researchers, and students to delve into the dynamic landscape of radiology in the digital age.

Objectives:

The primary objectives of the conference were to foster collaboration, encourage knowledge sharing, and raise awareness about the challenges and opportunities in the rapidly evolving field of radiology. The theme was about celebrating patient safety

Key Components:

1. Speakers:

The conference featured a distinguished speakers, including experts from the field of radiology, digital healthcare, and technological innovation.

2. Informative Presentations:

Engaging and informative presentations provided valuable insights into the advancements in radiology, especially in the context of the digital era. Topics covered ranged from technological interventions to emerging trends in patient care.

3. Interactive Sessions

4. Participants actively engaged in interactive sessions, where they had the opportunity to discuss and share their experiences, challenges, and innovative practices. This facilitated a dynamic exchange of ideas among professionals and students alike.

5. Workshops:

Hands-on workshops were conducted to enhance practical skills and demonstrate the application of cutting-edge technologies in radiological practice. Participants had the chance to explore new tools and methodologies, fostering a more hands-on understanding of digital advancements in patient care.

6. Enthusiastic Participation:

The conference witnessed enthusiastic participation from students and professionals, reflecting the collective eagerness to embrace and adapt to the digital transformations in radiology.

7. Theme: Patient Safety Care:

A central theme throughout the conference was the paramount importance of patient safety care in the digital era. Speakers emphasized the need for radiologists to maintain the highest standards of care while integrating digital technologies into their practices.

- **Conclusion:**

In conclusion, the event world radiology day organized by the Department of MRIT at Sushant University was a resounding success. The event not only provided a comprehensive overview of the evolving field but also facilitated meaningful interactions among professionals and students. The emphasis on patient safety care underscored the commitment of the radiology community to ensure the well-being of patients in an era of rapid technological change.
