Message from the Dean's Desk

At Sushant University, we believe in building professionals who can integrate their knowledge and skills committed to professional excellence. Considering the needs of the present and the future, the curriculum is adapted from the Ministry of Health and family welfare with a well-recommended curriculum, based on skills and competencies with expert faculty and innovative pedagogy and thus prepares the students for future regulations.

Steps have already been taken by the Government to regulate all health / allied health care professions and it is not far from reality. Those with poor knowledge and skills shall have a tough time to compete with the new policy of exit exam. Each professional in health care will have defined competencies and upskilling will be ongoing process.

We offer a varied bouquet of course to choose from like Pharmacy, Optometry, Psychology, Radiology, Lab sciences, Cardiovascular sciences, clinical research, public health etc. The clinical training is in campus labs and collaboration with many leading hospitals. Research, evidence based teaching and industry integration is our strength. There is huge demand of qualified health care professional. The scope is widening and the demand increasing.

About School of Health Sciences

Collaborations

Jyoticare Benevolent Foundation working in the field of community optometry help our students to enhance their skills in the aspect of community eye care.

Max Healthcare Institute Ltd. is a multi-specialty tertiary health care institute involved in patient care and academia. Our students are posted there for their clinical internship and training.

Medanta Institute of Education and Research is a multi-speciality tertiary health care institute involved in patient care and academia located in the heart of Gurgaon. Exposure to the clinical state of art facilities.

Dr Kapur's The Healing Touch Eye Centre is a super specialty eye care institute providing large range of eye health care facilities to the communities. A blend of clinical and community based work helps in shaping our students' in to future optometrist.

Western University of Health Sciences offer post graduation with benefit of international exposure and patient care at par with the health care standards followed in United states of America helping for a better chances of employability in other countries too.

Collaboration with the Russian based contact lens manufacturing company helps our students to pursue updated knowledge of future contact lenses now. This can create a better CL Practitioner and can take up a speciality practice in the field of contact lens.

During the internship with the ICare hospital, students are trained in comprehensive workup, specialty contact lenses and low vision practice for a better and confident practice in future.

Students Testimonials

Shivam Ojha

B.Sc. MLT (2018-2022)

It gives me great pleasure to say with pride that I am studying my under-graduate course in B.Sc. MLT from Sushant University. The relationship between faculties and student is very cordial, which gave me an opportunity to excel in my area of interest. This university is well equipped with facilities that brings about the best in students. The one year spent here were splendid and has helped me to grow better professionally and personally. The campus is filled with positive energy and exuberance. My first visit left me awestruck after looking at the atmosphere of the university. If you want to discover yourself, then this university is the best option you have.

DEEPIKA BISWAKARMA

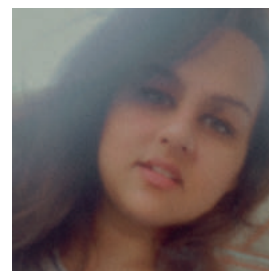

Master's in Optometry (2018-2020)

Sushant is very good University. In short duration of time, it got successful to establish new course in the university and gather sufficient amount of students. It's amazing that SVCC has regular patient flow and have specialty contact lens fitting practice, low vision assessment and Binocular vision therapy."

Bharvi yadav

Bsc Psychology (2020-2023)

It gives me great pleasure to say with pride that I am doing my Bsc. Psychology from Sushant School of Health science, Sushant University. The teachers here are really cooperating, friendly and helpful. Here I got the opportunity to excel in my areas of interest. It also provides inter college courses which increase our knowledge and helps in building social skills.

SYED NABEEL HAIDER ZAIDI

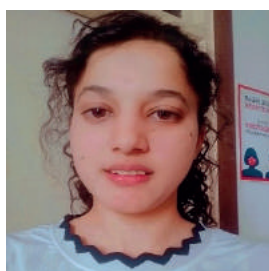

Bachelor's in Optometry (2019-2023)

I joined this course and everyday try to improve my skills through international conferences, associating with various organization through camps and so on. Optometry is the profession, which provides meaningful work that can significantly bring changes to the life of others and provide immense opportunities. After 2 years, I see myself as a successful clinical practitioner bringing sights to the people who are deprived of visualizing this beautiful world..

Saugat Rijal

B. Pharmacy (2019-2023)

As per my point of view I think that the biggest positive part of Online learning in this kind of Situation of global pandemic caused by COVID-19 is that we have been studying and learning in regularly basis as well as not having the dilemma in our mind about what will happen next, how will be our study and so on. Overall there have been a lot of positive impressions on us by online learning especially in this situation and last but not least I would like to thank the whole faculty of Pharmacy and Ansal University for making it possible for us to learn properly even in this adverse situation

Simran Kaur

B.Sc. MRIT (2020-2024)

Learning radiology at Sushant school of health and sciences is a very good opportunity to avail. As it provide very supportive Faculties with good specializations in this field. Moreover, the University has a very good environment for all the students
