Description (min 250 to max 800 words)*

Cybersecurity laws cover many areas and activities that occur online. Owing to the pandemic we are using digital platforms to a very great extent for teaching and learning processes. Hence, being aware of several cyber safety means to protect our privacy and data online becomes all the more important. These laws are made to protect people from malicious activities online. Issues such as online insults, character degradation, online harassment, and stalking can have a tremendous negative impact on the victims.

Cyber Law team of Sushant Legal Aid Clinic successfully conducted a legal

	<p>awareness session, exclusively for the students of Manaskriti school of Faridabad via online mode on "Millennials and Cyber Security" on 26th Feb, 2021, Time: 12pm to 1pm. Our speakers of the event were: Prof Vidushi, Cyber Security Laws- Assistant Professor, School of Law, Sushant University</p> <p>Dhaarna Sehgal, Convenor and Student Coordinator (SLAC)</p> <p>The objective of the webinar was to educate young students regarding various safety measures that should be taken for online activities like installing anti-virus and not to accept any files from unknown persons. Prof Vidushi addressed the students queries regarding cyber crimes in India. It was a highly interactive and engaging session. The school students were very eager to learn and participated with full enthusiasm. More than eighty senior school students participated in the event.</p> <p>Youngsters were encouraged to communicate to their parents or teachers regarding any issue related to online harassment or stalking that might make them feel uncomfortable.</p>

<p>Description (min 250 to max 800 words)*</p>	<p>The session focused on the novel techniques in Drug Delivery Systems. It provides a comprehensive insight into the history and technological advancement of drug delivery systems. How NDDS target, controls, modulate the delivery of drugs. How, maximum bioavailability and targeted drug delivery can be achieved for drugs.</p> <p>Advanced techniques used to accelerate systemic drug delivery to the specific target site, maximizing therapeutic efficacy and minimizing off-target accumulation in the body were discussed. Special emphasis was laid down on the different strategies used for formulation of nanoparticles, nano sponges, carbon nanotubes etc. Parameters meant for evaluation of nanoparticles, selection of ideal drug candidates and Future trends in designing of NDDS were discussed. Designing of different types of osmotic pumps, mucoadhesive gels, implants , microspheres etc was elaborated along with the ideal drug parameters for designing of controlled and sustained release formulations.</p> <p>The seminar further laid emphasis to understand various approaches for the development of novel drug delivery systems and to understand the criteria for the selection of drugs and polymers for the development of Novel drug delivery systems, their formulation, and evaluation. Approaches to design-controlled release formulations based on diffusion, dissolution, and ion exchange and pH control principles along with physicochemical and biological properties of drugs relevant to controlled release formulations was also discussed. An introduction to different types of polymers, classification, properties, advantages and application of polymers in the formulation of controlled release drug delivery systems.</p>

<p>Description (min 250 to max 800 words)*</p>	<p>Data Science is the deep study of a large quantity of data, which involves extracting some meaning from the raw, structured, and unstructured data. Extracting meaningful data from large amounts uses algorithms processing of data and this processing can be done using statistical techniques and algorithm, scientific techniques, different technologies, etc. It uses various tools and techniques to extract meaningful data from raw data. Data Science is also known as the Future of Artificial Intelligence.</p> <p>School of Engineering and technology organized an expert lecture on the filed on 18th March 2021, where expert speaker Mr. Bharat Khushlani an eminent researcher from IISC Bangalore shared his wisdom with the students. The event characterized with sharing of knowledge on the topic and questioning by our very talented students.</p>
