1. **Course Overview:** This value-added course introduces undergraduate students to the rich tapestry of Indian Knowledge Systems (IKS). By exploring the diverse wisdom and cultural heritage of India, students gain a deeper understanding of the philosophical, ethical, and cultural foundations that underpin Indian thought.

### 2. Objectives of the Course:

After the completion of the course the student will be able to-

- Discussing the future of IKS in a globalized world
- Identifying challenges and opportunities for preserving and promoting IKS
- Have discussions on the relevance of IKS in various fields
- Provide Propose Future Applications in the promotion of IKS, particularly in fields like education, healthcare, and environmental sustainability.

3. **Course Challenges:** to look for Resources online and offline

### 1. Course Introduction and Objective

The course "Leadership Styles in Engineering Environments" offers a comprehensive exploration of leadership dynamics within the realm of engineering disciplines. Participants will delve into the fundamental principles of effective leadership, examining a spectrum of leadership styles including authoritarian, democratic, laissez-faire, transformational, and situational. Through a blend of theoretical frameworks and practical examples, participants will gain insights into how these various styles manifest in different engineering contexts, and the strengths and weaknesses associated with each.

#### Course Objectives:

1. Analyze the characteristics, strengths, and weaknesses of each leadership style to enable informed decision-making in different engineering scenarios.
2. Develop skills to assess and choose the most suitable leadership approach based on the unique requirements of engineering tasks and challenges.
3. Explore real-world case studies and scenarios to encourage the application of leadership theories to solve engineering-specific challenges.

### 1. Course Introduction and Objective

The course "Introduction to Light Around Us" delves into the nature of light as a form of energy and its characterization as a wave. Participants will explore how different colors of the spectrum correspond to light waves vibrating at distinct frequencies, leading to a diverse array of visual experiences. Additionally, the course will cover fundamental concepts such as reflection and refraction of light waves, shedding light on how these phenomena influence our perception of the world. Furthermore, participants will gain insight into how engineers harness the properties of light waves to develop innovative technologies and solve real-world problems.

Course Objectives.

1. Explain that light is a form of energy and that it can be characterized as a wave.
2. Explain that different colors of the spectrum represent light waves vibrating at different frequencies.
3. Describe reflection and refraction of light waves.
4. Explain how engineers use light waves.

### 2. Learning Outcomes

- Participants will grasp the concept of light as a form of energy and its characterization as a wave, providing a basis for further exploration.

### 1. Course Introduction and Objective

The course "Technical Report Writing" aims to equip participants with the necessary tools and techniques to produce high-quality reports. Emphasis is placed on employing efficient processes for planning and organizing information, ensuring logical organization within the report structure. Additionally, participants will gain awareness of plagiarism and learn strategies to prevent it, along with an introduction to various referencing styles and reference management tools to maintain academic integrity and enhance the credibility of their reports.

Course Objectives:

1. Employ an efficient process for planning and organizing information
2. Learn to organize a report logically
3. Awareness on Plagiarism and how to prevent plagiarism
4. Introduction to various referencing styles and reference management tools
