Description (min 250 to max 800 words)*

Ansal University has recently installed 200W Solar powered system under Awareness on "Sustainable energy for all" & installation of 200W Solar power system in one of its adopted villages - Turakpur, under Unnat Bharat Abhiyan 2.0 (UBA) on 1st August, 2019. This project is a solar powered home lighting system that uses solar powered fan and LED lighting technology in a more efficient way. The project is a solution to one of the common problems of power cuts faced by rural India.

Unnat Bharat Abhiyan 2.0 (UBA) is an initiative of MHRD, Govt of India. Through this initiative, Govt seeks proactive participation of higher educational institutions in developing rural India.

UBA is inspired by the vision of transformational change in rural development processes by leveraging knowledge institutions to help build the architecture of an Inclusive India. It is driven by IIT-Delhi.

Ansal University under UBA has adopted 6 villages for their development in collaboration with district administration. 1. Mumtajpur 2. Turkapur 3.

Baspadmka 4. Patiasooli 5. Bhokarka 6. Bargujjar.

The inauguration of the project was done by Hon'ble Vice Chancellor Dr. Raj Singh, Ansal University. He shared his vision for the sustainable development and the possible ways of a sustainable future. With technological intervention we can aim for the required transformative change and move towards clean and green technology. Under UBA, Ansal University's main focus will be on areas of Solar Energy, Biogas Energy and Rain Water Harvesting. We are living in an era when human behaviour drastically changes the earth environment and it is thus highly important to realize our responsibilities and act accordingly to find alternative to the ever diminishing resources for future generations.

Ansal University has also donated computer systems for learning and development of villagers and conducted tree plantation drive. Sarpanch, Turkapur and villagers thanked Unnat Bharat Team for their efforts in the village development.

Attendance Sheet*	Yes (Annexure 1)
Report Submitted by (write faculty coordinator name)	Dr Neha

ANNEXURE 1

Awareness on "Sustainable energy for all" & installation of 200W Solar power system in one of its adopted villages - Turakpur, under Unnat Bharat Abhiyan 2.0 (UBA)

Description (min 250 to max 800 words)*

On 23 August 2019, 20 students from Sushant University visited Parasoli village under the Unnat Bharat Abhiyan (UBA) initiative titled **"Empowering Villages: Sustainable Development for a Better Tomorrow."** The goal was to bridge the gap between rural communities and modern development practices by promoting sustainable agriculture, skill development, and local entrepreneurship.

During the visit, students and faculty engaged with villagers, focusing on sustainable farming techniques such as organic fertilizers, water conservation, and crop diversification. These practices were introduced to improve both environmental protection and agricultural productivity, benefiting the livelihoods of local farmers. Villagers were enthusiastic about adopting these methods, recognizing their potential to increase crop yields and protect the land. In addition to farming, the team emphasized skill development and entrepreneurship to supplement income. They introduced ideas such as home-based industries like handicrafts and food processing, which can diversify income

	<p>sources. The students shared real-life examples of successful rural entrepreneurs, inspiring villagers to explore similar opportunities for economic growth.</p> <p>Financial literacy was also a key component of the visit. Faculty members explained the importance of managing income, saving, and investing in small ventures. Government schemes and subsidies for rural entrepreneurs were discussed, and villagers were encouraged to take advantage of these programs. Informational booklets were distributed to reinforce the knowledge shared during the sessions.</p> <p>This visit marked the start of a long-term engagement aimed at uplifting the community and aligning with the goals of Unnat Bharat Abhiyan. The initiative exemplifies how academic institutions can contribute to rural development through education, innovation, and hands-on involvement. The students left with a deeper understanding of rural challenges, while the villagers expressed gratitude for the support and knowledge provided.</p>

Description (min 250 to max 800 words)*	<p>We make a living by what we get, but we make a life by what we give." —Winston Churchill</p> <p>On 8th November 2019, the students from the Call for Humanity Social Welfare Club, School of Engineering and Technology, in collaboration with the Unnat Bharat Abhiyan, conducted a heartwarming donation drive for the children of the Badgujjar community. This initiative was aimed at providing educational resources to underprivileged children, ensuring they have the necessary tools to pursue their studies and broaden their horizons. The focus of the donation drive was to distribute books, notebooks, and other essential stationery items, which would help the children in their academic journey. The event was a resounding success, with both the</p>

volunteers and the children expressing immense joy throughout the day. The children's radiant smiles perfectly captured the happiness and excitement they felt upon receiving the books and notebooks. For many of them, these simple yet essential items represent new opportunities for learning and personal growth. Access to educational resources is often a challenge in underserved communities, and this small contribution is a significant step in bridging that gap. The volunteers were deeply moved by the enthusiasm and eagerness displayed by the children, reinforcing the importance of such initiatives in shaping young minds. In addition to distributing materials, the students from **Call for Humanity** also took the time to interact with the children, sharing stories, engaging in educational games, and encouraging them to pursue their studies with dedication. These interactions helped build a strong sense of connection and empathy between the volunteers and the community. The students emphasized the long-term benefits of education, explaining how it can lead to brighter futures and open up new avenues of opportunity.

The donation drive not only fulfilled an immediate need but also ignited hope and inspiration among the children. The event reaffirmed the belief that small acts of kindness, such as providing educational supplies, can have a lasting impact on a child's life. With continued efforts, initiatives like these will continue to empower young learners in the Badgujjar community and beyond, ensuring they have the resources and support they need to succeed academically.

Eye Camp Mumtazpur

Description (min 250 to max 800 words)*

Under the Unnat Bharat Abhiyan (UBA) initiative, another impactful activity was conducted in Mumtazpur village, Haryana, on 21st November 2019. The School of Engineering and Technology (SET), in collaboration with the Sushant School of Health Sciences (SSHS), organized a comprehensive eye screening camp for the village residents. This initiative aimed not only to provide basic healthcare services but also to improve the overall well-being of the villagers by addressing a critical aspect of health—vision care.

Latika

	<p>The eye screening camp was a crucial step in detecting early-stage vision impairments and providing immediate support to the villagers who needed further treatment or corrective measures, such as spectacles. Many of the residents, especially the elderly, availed the opportunity to get their eyes checked, and several individuals were referred for further medical care, ensuring they received timely treatment. The eye screening camp was met with great enthusiasm, and the villagers were grateful for the accessible healthcare provided to them at their doorstep.</p> <p>In addition to the health camp, the SET and SSHS teams also engaged in data collection for a village-wide survey. This involved the procurement of valuable information through household survey forms, which provided insights into the demographic, social, and economic conditions of the villagers. This data is essential for future initiatives and planning under the Unnat Bharat Abhiyan, as it helps the organizing teams tailor their efforts to the specific needs of the village.</p> <p>The combination of healthcare services and data collection demonstrated a holistic approach to rural development, covering both immediate health concerns and long-term planning. This initiative reflects the commitment of SET and SSHS to improving rural life and contributing to sustainable development in line with the goals of Unnat Bharat Abhiyan.</p>

Description (min 250 to max 800 words)*

On 22nd September 2021, under the Unnat Bharat Abhiyan initiative, Sushant University conducted the "Safety First: COVID-19 Mask Distribution Drive" in the village of Turkapur. This initiative aimed to protect the rural community during the pandemic by distributing essential protective gear and raising awareness about safety protocols. The drive was organized by the School of Engineering and Technology (SET), Sushant University, in collaboration with local authorities.

The village of Turkapur, like many rural areas, faced challenges in accessing proper healthcare resources and protective supplies during the pandemic. To address this, a dedicated team of SET students and faculty members visited the village, distributing high-quality, reusable masks to over 500 families. These masks were part of the broader effort to curb the spread of COVID-19, particularly in regions with limited access to medical support. During the drive, volunteers followed strict safety protocols while distributing masks and informational pamphlets that explained the importance of wearing masks, proper handwashing techniques, and maintaining social distancing. In addition to mask distribution, the team actively engaged with the villagers to educate them on the best practices for safeguarding themselves and their families from the virus. The volunteers held small group discussions to ensure that each community member understood the preventive measures, emphasizing the collective responsibility in fighting the pandemic. Local leaders in Turkapur supported the initiative by helping to gather residents and ensuring the message reached everyone in the village. The response from the community was positive, with many expressing their gratitude for the protective masks and the vital information provided.

This drive not only provided immediate relief but also empowered the villagers with knowledge on how to protect themselves in the long term. The successful collaboration between Sushant University and the local community underscored the importance of continuous efforts in

	safeguarding vulnerable populations during critical times.

(Geotag) Photograph-1*	 <p><u>Turkapur Visit</u></p>
(Geotag) Photograph-2	 <p><u>Turkapur Visit</u></p>
Description (min 250 to max 800 words)*	<p>On 30th September 2021, the students of the School of Engineering & Technology (SET) at Sushant University visited Turkapur, one of the adopted villages under the Unnat Bharat Abhiyan (UBA) Cell, an initiative of the</p>

Ministry of Human Resource Development (MHRD), Government of India. This visit was a significant step in bridging the gap between students of higher education institutions and rural India, offering the students a firsthand experience of rural life and its challenges. The initiative aimed to inspire students to contribute towards the development of rural communities, fostering a sense of social responsibility and innovation.

The primary goal of the visit was to help students understand the realities of rural India by connecting them with the local population and exposing them to the unique challenges faced by villagers. Through interactive sessions and field visits, the students learned about the various developmental activities undertaken by the **Unnat Bharat Abhiyan Cell** in Turkapur and other adopted villages. This exposure provided them with valuable insights into the **socio-economic** and **environmental** issues that rural communities deal with daily.

One of the key aspects of the visit was the emphasis on transforming challenges into opportunities. The students engaged in discussions with the villagers to identify the most pressing problems, such as limited access to resources, agricultural inefficiencies, and lack of infrastructure. By applying the knowledge and skills gained through their academic training, the students brainstormed potential solutions to address these issues, thus turning **problems into opportunities** for development.

This visit also served as a platform for students to witness the impact of UBA's initiatives, such as promoting sustainable agriculture, enhancing local livelihoods, and improving access to education and healthcare. The hands-on experience provided by the visit allowed the students to connect theory with practice, helping them understand how grassroots initiatives can be leveraged to drive sustainable rural development.

The event not only helped the students appreciate the work done by the UBA Cell of Sushant University in its adopted villages but also empowered them to think critically about how

	they could contribute to similar initiatives in the future. By fostering this connection between academia and rural development, the School of Engineering & Technology continues to play a pivotal role in promoting social innovation and community engagement through experiential learning opportunities.

Description (min 250 to max 800 words)*	On 8th October 2021, the School of Engineering and Technology (SET) and the School of Health Sciences at Sushant University, in collaboration with Unnat Bharat Abhivan

(UBA), organized a **Comprehensive Health Checkup Camp** at **Baspadamka Village in Gurgaon**. This camp aimed to provide essential healthcare services to the village's entire population, including children, women, and men, as part of UBA's mission to improve rural health outcomes. The involvement of SET in this initiative underscored the school's commitment to holistic community development by combining its technical and logistical support with health services to benefit rural communities. The **School of Engineering and Technology (SET)** played a crucial role in the successful execution of the camp by providing essential support in organizing the event. The engineering students and faculty members were actively involved in setting up the logistics, ensuring that the camp operated smoothly and efficiently. They assisted in managing the flow of villagers, ensuring proper sanitation measures, and facilitating communication between the medical team and the participants. This collaboration between SET and the School of Health Sciences highlighted the importance of interdisciplinary teamwork in addressing rural healthcare challenges. During the camp, the villagers received free medical checkups, with doctors focusing on various health issues such as general wellness, blood pressure, glucose levels, and other common concerns. Women and children, in particular, were given special attention, with healthcare professionals advising them on maternal and child health, proper nutrition, and hygiene practices. SET's involvement extended to ensuring that educational materials on health and hygiene were effectively distributed among the villagers, reinforcing the importance of preventive care.

Doctors prescribed necessary treatments and precautions for the villagers based on their medical assessments, and some were referred for follow-up consultations if required. The camp also served as an important platform for educating the community about healthy lifestyle choices, emphasizing preventive measures such as maintaining hygiene, proper nutrition, and regular checkups. This initiative reinforced SET's dedication to serving the community, not just through engineering and technological advancements, but by playing an active role in

	improving the overall well-being of rural populations.

*Cow shelter Visit by SET Students*

(Geotag) Photograph-2

*Cow shelter Visit by SET Students*

Description (min 250 to max 800 words)*

Students from the **School of Engineering & Technology (SET)** at **Sushant University** had the unique opportunity to visit a **cow shelter in Baliyawas, Gurugram**, and it turned out to be an unforgettable and enriching experience. The visit was not only an educational trip but also a chance for the students to engage with nature and understand the importance of animal care and husbandry, particularly in relation to cows. The **owner of the shelter** was truly remarkable, sharing extensive knowledge about **animal husbandry** and the vital role that cows play in our ecosystem and society. The students were captivated by the insights into how cows, often seen as simple creatures, actually possess a **sophisticated palate** and require a clean, healthy environment to thrive. The importance of a **balanced diet** for the well-being of cows was highlighted, along with the need for proper care to ensure their health and productivity. These animals, often referred to as the **unsung heroes of society**, provide us with not only milk but also manure, which is essential for agriculture, making them an integral part of rural life and farming. The **highlight of the visit** for the students was the

hands-on experience of **feeding the cows**. This simple yet profound act of caring for these gentle creatures allowed the students to connect more deeply with the animals and appreciate their contribution to human life. The joy of feeding and interacting with the cows left a lasting impression on the students, reinforcing the need for kindness, compassion, and respect for all living beings.

Beyond the educational aspects, the visit to the cow shelter was a way for the students to **give back to the community**. It emphasized the connection between humans, animals, and nature, reminding the students of the interdependence that sustains life. They walked away with a greater understanding of the significance of cows in our daily lives and how essential it is to maintain a healthy environment for them to flourish. Overall, the visit to the cow shelter provided the students with valuable lessons in **animal care, sustainability, and community service**. It was not just a learning experience but also a reminder of the importance of connecting with nature and contributing positively to the environment.

Description (min 250 to max 800 words)*

The School of Engineering & Technology (SET) at Sushant University successfully organized an impactful event titled **"Clean and Green Haryana: Promoting Eco-Friendly Practices in Villages"** as part of the United Nations' Sustainable Development Goals (SDGs). This initiative, which took place in Sirsa, Haryana, saw a dedicated team of **two faculty members and 15 students** engaging with the local community to promote sustainable and eco-friendly practices in rural areas. The event aimed to create awareness and encourage villagers to adopt environmentally conscious habits, contributing to a cleaner and healthier environment. The students and faculty actively interacted with the villagers through a series of awareness campaigns focused on key issues such as **waste management, water conservation, and tree plantation**. These campaigns were designed to educate the community on the importance of sustainable living and how small, everyday actions can significantly reduce their environmental impact. The initiative was aligned with the broader goals of the **Clean and Green Haryana** drive, which focuses on enhancing the green cover, improving air quality, and ensuring the well-being of rural communities. A significant highlight of the event was the **hands-on workshops** conducted by the students on **waste segregation**. These workshops emphasized the need for recycling, composting organic waste, and reducing landfill use. Villagers were educated on how to separate biodegradable and non-biodegradable waste and were encouraged to adopt these practices in their daily lives. By

	<p>promoting these simple yet effective waste management techniques, the initiative aimed to empower the rural population to take control of their local environment and reduce pollution.</p> <p>In addition to waste management, the event featured a tree plantation activity, where students and villagers worked together to plant saplings around the village. This activity not only contributed to improving the village's air quality but also promoted biodiversity by increasing the green cover. Tree plantation serves as a long-term investment in the village's environment, enhancing both the aesthetic and ecological value of the area.</p> <p>Awareness sessions on reducing plastic use were also a key component of the initiative. Students engaged villagers in discussions on the environmental harm caused by plastics and provided practical solutions, such as switching to cloth bags and biodegradable products. The event successfully encouraged the community to move away from single-use plastics and adopt more sustainable alternatives. Through these activities, the School of Engineering & Technology played a pivotal role in promoting eco-friendly practices in Sirsa, Haryana, contributing to the overall goal of building sustainable rural communities.</p>

Description (min 250 to max 800 words)*	<p>The School of Engineering & Technology (SET) at Sushant University successfully organized an impactful event titled "Health for All: Improving Rural Health and Wellness through Awareness" as part of their ongoing efforts to promote health and wellness in rural communities. On this occasion, a team of 20 students and 2 faculty members visited Aklimpur, a rural area near Gurgaon, to actively engage with the local community and offer essential health services.</p> <p>The event aimed to improve the health outcomes of the villagers by conducting free health camps that provided basic medical consultations and</p>

check-ups. These camps were instrumental in addressing some of the common health issues prevalent in rural areas, where access to healthcare services is often limited. The doctors and students involved in the health camp conducted **general health screenings**, checked vital signs such as blood pressure and glucose levels, and provided medical advice to those in need. This initiative ensured that even the most vulnerable members of the community had access to healthcare, thereby enhancing their overall well-being.

In addition to the health camps, the team organized a series of **awareness sessions** that focused on important topics such as **nutrition, hygiene, and preventive healthcare**. The sessions were designed to educate the villagers about the significance of maintaining a balanced diet, practicing good hygiene, and adopting preventive measures to avoid common illnesses. The importance of **regular health monitoring** was emphasized, with the goal of encouraging villagers to proactively take charge of their health rather than waiting for issues to become severe.

As part of the outreach, the students distributed **informational pamphlets** that contained vital health tips and guidance on topics such as proper sanitation, disease prevention, and healthy eating habits. These pamphlets served as a resource for the villagers, providing them with the knowledge needed to make healthier choices in their daily lives.

The students also engaged directly with the villagers, holding one-on-one conversations to better understand their health challenges and offer personalized advice. By promoting better health practices and educating the community on the importance of preventive healthcare, the initiative aimed to **empower the rural population** to lead healthier, more informed lives.

Overall, the "Health for All" event was a resounding success, helping to raise health awareness in Aklimpur and providing

Katun

	much-needed medical services to the local population.

(Geotag) Photograph-2	 <p><u>Donation Drive - Ghatta Village</u></p>
Description (min 250 to max 800 words)*	<p>On 31st October 2023, students from the School of Engineering & Technology (SET) at Sushant University organized a book donation drive and visited underprivileged children in Ghatta Village, Gurgaon. This initiative was part of SET's ongoing commitment to community service and aimed to provide educational resources to those who have limited access to books and learning materials. The visit was a significant step towards fostering a love for learning and encouraging these children to pursue education with renewed enthusiasm and hope. The book donation drive was designed to empower underprivileged children by equipping them with the tools necessary for their educational journey. Many children in</p>

rural and underserved communities face barriers to education due to a lack of resources, and the donation of books played a vital role in bridging this gap. By providing these children with access to reading materials, the initiative aimed to ignite their curiosity, enhance their literacy skills, and encourage a lifelong pursuit of knowledge. During the visit, SET students personally handed out books to the children and took the time to interact with them, discussing their favorite subjects, dreams, and ambitions. This personal engagement made the experience even more impactful, as the children not only received much-needed educational resources but also felt supported and encouraged by the university students. The students were moved by the enthusiasm the children showed for learning, despite the challenges they face in their daily lives.

The drive emphasized the importance of **education as a tool for empowerment**. By donating books, the SET students hoped to inspire the children to dream big and pursue academic success, regardless of their socio-economic background. The children's excitement and gratitude were palpable, making the experience deeply fulfilling for everyone involved. This visit was a testament to the **positive impact** that simple acts of kindness and support can have on underprivileged communities. The SET students left Ghatta Village with a sense of purpose, knowing they had contributed to creating **opportunities for education** and personal growth for these children. The initiative also reinforced SET's commitment to **social responsibility** and **community outreach**, showing that education is not just about academic achievement, but also about making a difference in the lives of others.

(Geotag) Photograph-2	 <u>Visit to Earth Saviours Foundation</u>
Description (min 250 to max 800 words)*	<p>On 17th November 2023, students from the School of Engineering & Technology (SET) at Sushant University visited the Earth Saviours Foundation, Bandhwari, Faridabad, with the noble purpose of providing support and companionship to the elderly. This visit was a significant part of SET's ongoing community outreach initiatives, where students are encouraged to engage with different societal groups and contribute to their well-being. The focus of this visit was to extend care, compassion, and practical assistance to the elderly residents of the foundation, many of whom are in need of emotional support and companionship. During the visit, the students actively participated in a range of activities designed to bring joy, comfort, and companionship to the elderly individuals. Engaging in meaningful conversations, sharing</p>

stories, and offering practical help, the students aimed to create an atmosphere of warmth and connection. For many of the elderly, these interactions were a source of great comfort, as they not only provided company but also demonstrated that they were valued and appreciated by the younger generation. Through these interactions, students were able to **forge meaningful connections** and gain **valuable insights** into the experiences and wisdom of the elderly, which enriched their own understanding of life and the challenges faced by the senior population. The visit allowed the students to recognize the importance of **compassion, empathy, and respect** in their approach to community service. By offering assistance with daily tasks and spending quality time with the residents, the students sought to improve the emotional well-being of the elderly, many of whom live in isolation. The act of simply being present, listening, and offering companionship had a profound impact, making the elderly feel more connected and valued.

This experience was both **humbling and enriching** for the students, reaffirming their commitment to **serving and uplifting the elderly population**. It also underscored the importance of intergenerational relationships, where the younger generation can learn from the wisdom and life experiences of the elderly. The visit to the Earth Saviour Foundation not only brought a sense of belonging and happiness to the elderly but also reminded the students of their responsibility to give back to society with compassion and empathy.

Fig 2 The interactions focused on making people aware

Description (min 250 to max 800 words)*

In the realm of heritage conservation, the focus often gravitates towards tangible assets such as historic buildings, monuments, and archaeological sites. However, equally significant yet often overlooked are the intangible aspects of cultural heritage—traditions, rituals, oral histories, and cultural practices passed down through generations. "Cultural Routes" is an initiative aimed at raising awareness about the intangible aspects of conservation, emphasizing the importance of preserving these cultural narratives and traditions.

Understanding Intangible Heritage:

Intangible heritage encompasses a myriad of elements that define a community's identity and cultural legacy. This includes traditional craftsmanship, performing arts, folklore, language, cuisine, rituals, and social customs. These intangible expressions of culture are deeply intertwined with people's daily lives, shaping their identities, values, and sense of belonging.

Objectives of the Awareness Campaign:

Educate and Sensitize: Increase public awareness and understanding of intangible cultural heritage, highlighting its significance in fostering social cohesion, intergenerational dialogue, and sustainable development.

Document and Preserve: Advocate for the documentation and preservation of intangible heritage practices threatened by globalization, urbanization, and changing socio-economic dynamics.

Celebrate Diversity: Celebrate the richness and diversity of intangible cultural expressions, recognizing the unique contributions of different communities to our shared human heritage.

Promote Sustainable Tourism: Foster responsible tourism practices that respect and promote local cultural traditions, encouraging visitors to engage with communities in meaningful ways.

Campaign Strategies and Activities:

Community Workshops and Seminars: Organize interactive workshops and seminars in collaboration with local communities, cultural practitioners, and experts to discuss the significance of intangible heritage and explore strategies for its preservation.

Cultural Festivals and Performances: Showcase traditional music, dance, storytelling, and culinary arts through cultural festivals and performances, providing platforms for artists to share their talents and narratives with a wider audience.

Oral History Projects: Facilitate oral history projects to record and document narratives, memories, and traditions passed down through generations, ensuring their preservation for future generations.

Youth Engagement Programs: Engage young people through educational programs, art competitions, and youth-led initiatives that encourage active participation in safeguarding intangible heritage.

Digital Platforms and Multimedia Campaigns: Utilize digital platforms, social media channels, and multimedia campaigns to disseminate information, share stories, and raise awareness about intangible heritage conservation.

Expected Outcomes:

Increased awareness and appreciation for the importance of intangible cultural heritage in fostering cultural diversity, social cohesion, and sustainable development.

Strengthened partnerships and collaborations between communities, governments, NGOs, and cultural institutions in support of intangible heritage preservation efforts.

Enhanced cultural pride and sense of identity among communities through the recognition and celebration of their intangible cultural expressions.

Sustainable tourism practices that promote respectful engagement with local communities and traditions, contributing to the preservation and transmission of intangible heritage.

"Cultural Routes" endeavors to illuminate the intangible dimensions of cultural heritage, recognizing them as vital threads in the rich tapestry of human civilization. By fostering greater awareness, appreciation, and stewardship of intangible heritage, we can ensure its continuity and relevance for future generations, enriching our collective cultural landscape and fostering a more inclusive and harmonious world. Let us embark on this journey together, honoring the diverse cultural legacies that unite us as a global community.

Description (min 250 to max 800
words)*

The Badshahpur Bawdi is located in the present day city of Gurugram, as part of a settlement known as Badshahpur. Badshahpur was a census town as a part of the 2011 Census of India, but got absorbed in the municipal boundary of Gurgaon, now Gurugram, in 2012. The Badshahpur Bawdi appears to date from late 19th century in terms of continuity of late Mughal architectural vocabulary intermixed with Colonial. But as per a stone plaque affixed onto one of its arches as well as per the dating done by the AIIS in 2008, it is attributed to the year 1905. This was also revealed during studies carried out by our students as a part of their second semester studio project.

The two-storied structure has three points of entrance, known to be for men, women and cattle respectively. As per various studies done by the AIIS and by SSAA MARCH (BH) students, the structure is approximately 60 meters long and 10 meters wide. An interesting mix of late Mughal and colonial architectural vocabulary, the Bawdi

was built by a landowner of Badshahpur whose descendants still live in Gurugram and Badshahpur. The Bawdi is one of the scarce reflections of a layer of history from British India in the region. The last decade and a half has seen a huge transformation in terms of the immediate context of the Bawdi.

The expanse of land around the Bawdi was cut into land parcels and developed over this period of time, affecting its ecological setting. A primary government girls' school was built adjacent to the eastern edge of the Bawdi and a secondary government girls' school further beyond. Highrise housing development came up just 200 meters from the Bawdi and a Sector Road was proposed to be constructed close to it in the Final Development Plan 2021 AD of Gurgaon Manesar Urban Complex in 2012.

The 100 days entailed workshops with government schools in the vicinity of the Badshahpur Bawdi, collaborative outreach activities along with documenting and developing proposals of reuse for the site. The events organised to raise awareness and map stakeholder perceptions were:

- 30.10.2019 (Day 01)- Site visit by M Arch Built heritage student and faculty.
- 08.11.2019 (Day 20)- On-campus talk by Ms. Victoria Lautman, on her book 'The Vanishing Step Wells of India.
- 08.12.2019 (Day 40)- Banner installation at the Bawdi by the students of M Arch BH.
- 18.12.2019 (Day 50)- Cleaning of the Bawdi by the owner Mr. Ved Prakash Mangla
- 24.12.2019 (Day 56)- Visit to the Bawdi with students of 5th year B Arch Elective 'Architecture Journalism' and Masters' Elective 'Humanistic Design' from SSAA.
- 26.12.2019 (Day 58)- Understanding building defects with M Arch BH students.
- 30.01.2020 (Day 91)- SSAA collaborated with ICOMOS India (North Zone) to mark the World heritage day at the Bawdi.

The Project was taken as a part of the M Arch BH Second Semester studio, through which the students developed conceptual proposals for conservation and reuse of the Badshahpur Bawdi.

(Geotag) Photograph-2	 <p>Interactive talk on heritage understanding</p>

Description (min 250 to max 800 words)*

In the fast-paced urban landscape of Gurugram, amidst towering skyscrapers and modernity's relentless march, there lies a silent narrative of lost typologies, whispering tales of a bygone era. As the city burgeons with technological advancements and commercial developments, its heritage, often overlooked, stands at the brink of oblivion. Among these fading relics, the Havelis and Chaupals symbolize a cultural richness that is fading into obscurity.

Havelis: Once the epitome of opulence and architectural grandeur, Havelis adorned the landscape of Gurugram, reflecting the affluent lifestyle of its erstwhile inhabitants. These sprawling mansions, characterized by intricate carvings, sprawling courtyards, and ornate facades, were the pride of the city's heritage. However, rapid urbanization and neglect have left many Havelis dilapidated, their walls echoing forgotten whispers of history.

In Gurugram's relentless pursuit of modernity, many Havelis have succumbed to the wrecking ball, making way for gleaming skyscrapers and commercial complexes. The few that remain stand as solemn reminders of a bygone era, their fading glory a testament to the city's changing landscape. Efforts to preserve these architectural marvels are underway, albeit overshadowed by the clamor of progress.

Chaupals: In stark contrast to the grandeur of Havelis, Chaupals served as the heartbeats of rural communities, fostering social cohesion and communal harmony. These open-air gathering spaces, nestled amidst verdant fields and rustic landscapes, were the epicenters of dialogue, deliberation, and cultural exchange. Here, under the canopy of ancient trees, villagers congregated to share stories, resolve disputes, and celebrate festivities.

However, with the tide of urbanization sweeping across Gurugram's peripheries, many Chaupals have faded into oblivion, their once bustling courtyards now silent and deserted. The encroachment of concrete jungles has eroded the very essence of community life, relegating these sacred spaces to the annals of history.

	<p>Yet, amidst the encroaching shadows, glimmers of hope emerge. Initiatives such as Heritage Watch strive to reignite the flame of cultural preservation, advocating for the protection and restoration of Gurugram's lost typologies. Through community engagement, awareness campaigns, and advocacy efforts, these endeavors seek to safeguard the city's heritage for future generations.</p> <p>As Gurugram embarks on a journey of urban transformation, it is imperative to recognize the intrinsic value of its cultural heritage. The preservation of Havelis and Chaupals not only pays homage to the city's storied past but also fosters a sense of identity and belonging among its inhabitants. In embracing its heritage, Gurugram can carve a path towards sustainable development that honors the legacy of generations past while paving the way for a more inclusive and resilient future.</p>

Description (min 250 to max 800 words)*

In the age of digital activism and social media influence, the power of a hashtag transcends mere words—it serves as a catalyst for change, a beacon of awareness, and a rallying point for communities. This community engagement, knowledge exchange & awareness on unnoticed heritages of peripheral villages of Gurgaon is an innovative campaign designed to shed light on unnoticed heritage, particularly focusing on the architectural gems of Havelis that adorn our cultural landscape.

Objectives:

Raise Awareness: Spark conversations and raise awareness about the significance of Havelis as vital components of our cultural heritage.

Foster Engagement: Encourage active participation from individuals, communities, and

stakeholders in the preservation and promotion of Havelis.

Document Heritage: Create a digital repository of Havelis across regions, capturing their architectural nuances, historical anecdotes, and cultural relevance.

Advocate for Preservation: Advocate for the conservation and restoration of Havelis through collaborative efforts and community-driven initiatives.

How to Participate:

Spot a Haveli: Whether you stumble upon a majestic Haveli in your neighborhood or encounter one during your travels, capture its essence through photographs or videos.

Share Your Discovery: Post your images or videos on social media platforms such as Instagram, Twitter, or Facebook using the hashtag #HashtagAHaveli. In your captions, share insights about the Haveli's history, architecture, and significance.

Tag and Nominate: Encourage friends, family, and followers to join the movement by tagging them in your posts and nominating them to share their own Haveli discoveries.

Engage with the Community: Engage in discussions, share stories, and exchange knowledge about Havelis with fellow participants. Explore different perspectives and learn about the diverse cultural heritage represented by Havelis.

Support Preservation Efforts: Amplify the voices of heritage conservationists, organizations, and local communities working tirelessly to preserve and protect Havelis. Consider donating or volunteering for preservation projects in your area.

Expected Impact:

Increased Awareness: The campaign aims to reach a diverse audience, fostering a deeper appreciation for Havelis and their cultural significance.

Community Empowerment: By actively involving individuals and communities in the preservation process, the campaign empowers them to become stewards of their heritage.

	<p>valuable resource for researchers, historians, and enthusiasts.</p> <p>Policy Advocacy: The campaign will advocate for policy measures and funding initiatives to support the conservation and restoration of Havelis at local, regional, and national levels.</p> <p>This event is more than just a social media campaign—it is a call to action, an invitation to rediscover, celebrate, and safeguard our cultural heritage. Together, let us embark on a journey to uncover the hidden stories, intricate designs, and timeless beauty of Havelis, ensuring that they remain cherished symbols of our shared heritage for generations to come. Join the movement, and let's #HashtagAHaveli today!</p>

Discussion on post-covid approach about conservation of havelis

(Geotag) Photograph-2

A session on Jaisalmer Havelis

Description (min 250 to max 800 words)*

The traditional architectural typologies of India hold a profound place in the country's rich cultural and social heritage. Among the many distinctive styles that have evolved over centuries, havelis, with their introverted courtyard designs, stand as an iconic representation of Indian architecture. Recognizing the importance of preserving and understanding these structures, the M. Arch. BH program at Sushant School of Art and Architecture, Ansal University, organized a webinar titled Decoding the Haveli on May 9, 2020. This initiative aimed to delve into the intricacies of haveli architecture, exploring its historical significance, regional variations, and the challenges it faces today.

The webinar, held virtually due to the global pandemic, brought together experts, faculty, and students from various architectural backgrounds, offering a platform for rich discussion and debate. The focus was on the haveli as an essential component of India's architectural legacy, particularly in urban settings, where these structures often served as homes for affluent families. The havelis of cities such as Jaisalmer, Lucknow, and Delhi are renowned for their grand facades, detailed ornamentation, and the unique

design of their courtyards. These open spaces, often central to the home, were not merely decorative but served a functional purpose, offering ventilation, a private outdoor area, and a space for social activities within the confines of the household.

However, the webinar also addressed a more urgent issue: the gradual disappearance of these heritage structures. With rapid urbanization and changing lifestyles, havelis are increasingly being replaced by modern constructions, and their cultural significance is fading from public memory. The loss of these buildings is not just an architectural concern but also represents the erosion of the social structures and ways of life that havelis once supported. Traditional courtyard homes fostered strong family ties and provided a sanctuary from the hustle and bustle of city life. Today, the pressures of space, cost, and modern design preferences are threatening these spaces, leaving many havelis in a state of neglect or subject to demolition.

During the webinar, various experts highlighted the specific regional differences in haveli architecture, ranging from the intricately carved sandstone facades of Rajasthan to the more understated, yet equally grand, structures found in parts of North India. The discussion also touched upon the influence of climate, material availability, and local cultural practices on the design of these buildings. In regions like Rajasthan, for example, havelis were built to withstand the extreme desert heat, with thick walls and narrow windows helping to keep the interiors cool. The panel emphasized that each haveli is a unique reflection of its time, place, and the people who lived within its walls.

Participants in the webinar also explored potential solutions for the preservation and adaptation of havelis in the modern world. One idea discussed was the possibility of repurposing these historic structures for contemporary use, such as converting them into cultural centers, boutique hotels, or museums. By doing so, these buildings could be brought back to life, ensuring that they remain relevant and valuable in today's urban landscape. The concept of adaptive reuse is one way to strike a balance between preserving the past and meeting the needs of the present.

	<p>In conclusion, Decoding the Haveli served as a crucial reminder of the importance of protecting India's architectural heritage. As havelis continue to disappear, there is a growing need for awareness and action to prevent their extinction. Through initiatives like this webinar, the M. Arch. BH program at Sushant School of Art and Architecture is helping to keep these traditional typologies alive, fostering a deeper understanding of their cultural value and encouraging efforts to preserve them for future generations.</p>

Fig 2 Community discussion

Description (min 250 to max 800 words)*

In the rich tapestry of Indian socio-cultural history, certain architectural typologies stand as poignant reminders of a bygone era, embodying traditions, community life, and a unique sense of belonging. Among these, the chaupal and haveli hold significant cultural importance, reflecting not only architectural brilliance but also serving as hubs of social interaction, storytelling, and communal harmony.

The Chaupal:

In rural India, the chaupal emerges as a quintessential gathering space, embodying the essence of community life. Traditionally an open-air meeting place, often nestled under the shade of a spreading tree, the chaupal serves as a platform for discussions, deliberations, and celebrations. Here, villagers congregate to exchange news, share stories, and seek counsel from elders, fostering a sense of kinship and solidarity within the community.

The Haveli

In contrast, the haveli represents a symbol of opulence and grandeur, showcasing exquisite architecture and intricate craftsmanship. Typically found in urban centers and affluent regions, havelis are sprawling mansions adorned with ornate facades, elaborate courtyards, and intricately carved interiors. Beyond their aesthetic appeal, havelis serve as repositories of cultural heritage, echoing the stories of generations past and embodying the aristocratic lifestyles of bygone eras.

Preserving Socio-Cultural Heritage:

However, amidst rapid urbanization, changing lifestyles, and modernization trends, these architectural typologies face the looming threat of neglect, deterioration, and eventual extinction. As urban landscapes evolve and traditional values erode, the chaupal and haveli risk fading into oblivion, taking with them centuries of shared memories, cultural practices, and communal identities.

To address this pressing issue, an awareness drive aimed at preserving socio-cultural heritage becomes imperative. Such an initiative seeks to educate communities, policymakers, and stakeholders about the intrinsic value of these architectural marvels and the need for their conservation. Through advocacy campaigns, public forums, and collaborative partnerships, the awareness drive endeavors to instill a sense of pride and ownership among citizens, fostering a collective responsibility towards safeguarding our shared heritage.

Furthermore, the preservation efforts extend beyond mere architectural conservation, encompassing broader initiatives aimed at revitalizing community engagement, promoting cultural exchange, and nurturing a sense of belonging among diverse demographics. By leveraging innovative approaches such as adaptive reuse, heritage tourism, and community-driven initiatives, stakeholders can breathe new life into these historic spaces, transforming them into vibrant centers of cultural revival and socio-economic development.

In conclusion, the preservation of lost typologies such as the chaupal and haveli is not merely a

	matter of architectural conservation but a testament to our commitment to safeguarding the rich tapestry of socio-cultural heritage that defines our collective identity. Through concerted efforts and unwavering dedication, we can ensure that these timeless treasures continue to resonate with future generations, serving as enduring symbols of resilience, creativity, and community spirit in an ever-changing world.

<p>(Geotag) Photograph-2</p>	 <p>Fig 2 Mapping heritage culture Farrukhnagar</p>
<p>Description (min 250 to max 800 words)*</p>	<p>Nestled in the heart of Gurgaon, Farrukhnagar stands as a testament to the rich tapestry of history and culture that defines the region. With its centuries-old forts, majestic havelis, and intricate architectural marvels, Farrukhnagar embodies the essence of a bygone era, offering a glimpse into the vibrant heritage of the Mughal and British colonial periods. Against this backdrop of cultural richness and historical significance, the initiative titled "Heritage Exchange" emerges as a pioneering effort to foster meaningful connections between students and the local community, facilitating a deeper understanding and appreciation of Farrukhnagar's cultural legacy.</p> <p>The primary objective of the Heritage Exchange program is to bridge the gap between academic learning and real-world experiences by engaging students in immersive heritage visits that not only enrich their knowledge but also promote community involvement and collaboration. Through guided tours, interactive workshops, and</p>

	<p>hands-on activities, students are encouraged to explore Farrukhnagar's historical sites, engage with local residents, and gain insights into the cultural traditions and practices that have shaped the community over generations.</p> <p>Central to the Heritage Exchange program is the notion of reciprocity and mutual exchange between students and the community. Rather than viewing heritage as static monuments of the past, the program emphasizes the living heritage of Farrukhnagar, highlighting the ongoing efforts of local residents to preserve and celebrate their cultural identity. By actively involving community members as guides, storytellers, and cultural ambassadors, the program fosters a sense of ownership and pride among the residents, empowering them to share their stories and traditions with a broader audience.</p> <p>In conclusion, the Heritage Exchange program serves as a model for fostering meaningful connections between students and the community through the exploration and celebration of Farrukhnagar Gurgaon's cultural legacy. By embracing the principles of collaboration, inclusivity, and sustainability, the program not only enriches educational experiences but also contributes to the preservation and promotion of Farrukhnagar's rich heritage for generations to come.</p>

(Geotag) Photograph-1*

Fig 1: Briefing of the session

(Geotag) Photograph-2

Fig 2: Student explaining their work

Description (min 250 to max 800 words)*

Opening a dialogue between the community and students serves as a crucial step towards creating a more sustainable future. By inviting community members to share their perspectives, concerns, and aspirations, students can gain valuable insights into the needs and challenges facing their local area. This dialogue fosters mutual understanding, collaboration, and the co-creation of solutions that prioritize sustainability and the well-being of future generations.

Key objectives of such dialogues include:

Understanding Community Needs: Students engage with community members to understand their priorities, challenges, and aspirations related to sustainability and community development.

Identifying Opportunities: Through open dialogue, both students and community members can identify opportunities for collaboration and innovation to address pressing environmental, social, and economic issues.

Co-creating Solutions: By working together, students and community members can co-create sustainable solutions that are contextually relevant and responsive to local needs and realities.

Empowering Communities: Opening a dialogue empowers community members to actively participate in decision-making processes and initiatives that shape the future of their neighborhoods and environments.

Building Partnerships: Establishing partnerships between students and the community fosters long-term relationships and collective action towards common sustainability goals.

Practical steps to facilitate dialogue between the community and students may include:

Hosting Community Forums: Organize community forums, town hall meetings, or focus group discussions where community members can voice their concerns and ideas related to sustainability and community development.

Engaging in Participatory Processes: Implement participatory approaches such as community mapping, visioning exercises, and asset-based assessments to involve community members in identifying priorities and assets.

Facilitating Student-Community Projects: Encourage students to collaborate with community members on projects that address local sustainability challenges, such as community gardens, waste management initiatives, or renewable energy projects.

Promoting Active Listening and Respectful Dialogue: Create a supportive and inclusive environment where all voices are heard, and diverse perspectives are respected and valued.

Sharing Knowledge and Resources: Facilitate knowledge exchange and capacity-building activities between students and community members to share expertise, resources, and best practices for sustainability.

	In summary, opening a dialogue between the community and students is essential for fostering collaboration, understanding, and collective action towards building more sustainable and resilient communities for future generations. By harnessing the collective wisdom and creativity of both stakeholders, meaningful progress can be made towards achieving shared sustainability goals.

<p>Photograph-1*</p>	<p>(Geotag)</p> <p>Fig 1: On Site briefing</p>
<p>(Geotag) Photograph-2</p>	<p>Fig 2: Exploring lane interaction</p>
<p>Description (min 250 to max 800 words)*</p>	<p>Ghata Gaon, nestled amidst lush greenery, faces environmental challenges like many other communities. To address issues such as deforestation, improper waste management, and the need for recycling, a community engagement initiative has been launched targeting the children of Ghata Gaon. This initiative aims to instill a sense of responsibility towards the environment and foster sustainable practices among the younger generation.</p> <p>Objectives:</p> <p>Promote plantation activities to combat deforestation and enhance green cover. Educate children about the importance of waste segregation and recycling to reduce environmental pollution. Empower children to become advocates for environmental conservation within their community.</p> <p>Approach:</p> <p>Plantation Drives:</p> <p>Organize tree plantation events where children actively participate in planting saplings. Educate them about the significance of trees in maintaining ecological balance and mitigating climate change. Encourage children to take ownership of the planted trees by nurturing and monitoring their growth.</p> <p>Waste Segregation Workshops:</p> <p>Conduct interactive workshops to educate children about the importance of waste segregation at the source. Demonstrate practical methods of segregating biodegradable and non-biodegradable waste. Emphasize the role of proper waste management in reducing environmental pollution and promoting public health.</p> <p>Recycling Awareness Programs:</p>

Arrange awareness sessions highlighting the concept of recycling and its benefits.

Showcase creative examples of upcycling and recycling waste materials into useful products.

Encourage children to initiate recycling initiatives within their households and schools.

Community Engagement:

Involvement of Parents and Guardians:

Encourage parents and guardians to actively participate in environmental activities with their children.

Organize family-oriented events such as eco-friendly picnics and nature walks to foster a deeper connection with the environment.

Collaboration with Local Authorities and NGOs:

Forge partnerships with local government bodies and non-profit organizations specializing in environmental conservation.

Seek support for organizing community-wide initiatives and accessing resources for sustainability projects.

Impact Assessment:

Conduct regular assessments to measure the impact of the initiative on children's knowledge and attitudes towards environmental conservation. Monitor the progress of plantation efforts and track the survival rate of planted trees.

Evaluate the effectiveness of waste segregation practices and recycling initiatives within the community.

The community engagement initiative in Ghata Gaon represents a collaborative effort to raise awareness about environmental conservation among children. By empowering the younger generation with knowledge and skills, the initiative aspires to create a sustainable future where harmony between humanity and nature thrives. Through continued dedication and collective action, Ghata Gaon can emerge as a beacon of environmental stewardship for generations to come.

Figure-2 Workshop on Cyber awareness

Figure-3 Interactive session with the rural community

Description (min 250 to max 800 words)*

As part of its ongoing commitment to social responsibility and community empowerment, Sushant University is launching a Rural Development Initiative aimed at fostering growth and development in rural areas. The upcoming event, scheduled for **17th May 2024**, will take place in **Rankhanda Village, Jhajjar**, where two interactive workshops will be conducted, alongside a **book donation drive** for local government school students. This initiative seeks to bridge the rural-urban divide through education, creativity, and awareness, focusing on the holistic development of the village community.

The first workshop, focusing on **Sketching and Origami**, will offer a platform for students and villagers to explore their creativity and artistic talents. Sketching is a fundamental skill that enhances visual thinking, attention to detail, and creative expression. Origami, the

ancient Japanese art of paper folding, is not only a fun activity but also improves fine motor skills, concentration, and spatial awareness. This workshop will be a hands-on experience, encouraging participants to engage in artistic activities that promote critical thinking and problem-solving while celebrating rural creativity. The aim is to introduce creative learning methods that can complement the existing education system in the village.

The second workshop will be dedicated to **Cyber Crime Awareness**, addressing an urgent and often overlooked issue in rural communities. With the increasing penetration of smartphones and internet access in rural areas, the risks of cyber fraud, online scams, and digital exploitation have also risen. This session will educate villagers, including school students, on the dangers of cybercrime, how to protect themselves online, and where to seek help if they encounter suspicious activity. This workshop aims to empower the rural population with knowledge and tools to navigate the digital world safely.

In conjunction with these workshops, a **Book Donation Drive** will be organized for the students of the local government school. Education is the foundation of rural development, and this initiative seeks to provide children with essential learning materials that will enhance their academic journey. The donation drive aims to supply a range of books to support their educational growth and foster a reading culture in the village.

Through these workshops and the book donation drive, Sushant University aims to contribute meaningfully to the development of Rankhanda Village, Jhajjar, creating a lasting impact on the community's educational and social well-being.

<p>(Geotag) Photograph-1*</p>	<p>Fig 1: Community interaction on site</p> 
<p>(Geotag) Photograph-2</p>	<p>Fig 2: Design intervention based on feedback</p> 
<p>Description (min 250 to max 800 words)*</p>	<p>The Social Development through Design Intervention workshop, organized by students of Sushant School of Art and Architecture at Sushant University, Gurgaon, was a dynamic platform aimed at addressing pressing social issues through innovative design solutions.</p>

With a focus on social awareness and community engagement, students collaborated across disciplines to explore how design interventions could positively impact societal development. Through hands-on activities, design charrettes, and interactive projects, participants delved into issues such as poverty alleviation, environmental sustainability, and access to education and healthcare. By leveraging their creative skills and empathetic understanding of community needs, the workshop fostered a spirit of social responsibility and empowerment among students, paving the way for impactful change in local and global communities.

The workshop was meticulously structured to maximize student engagement and learning. It began with a series of lectures and presentations from experts in the fields of social development and design. These sessions provided participants with a theoretical foundation and a broad understanding of the challenges and opportunities in using design for social good. Following these introductory sessions, students were divided into smaller groups to work on specific projects. Each group was tasked with identifying a particular social issue and developing a design intervention to address it.

Throughout the workshop, students had access to a variety of resources, including design studios, prototyping tools, and mentorship from faculty members and industry professionals. This support system enabled them to experiment with different ideas and approaches, ultimately leading to more innovative and effective solutions. The hands-on nature of the workshop allowed students to apply their theoretical knowledge in practical settings, enhancing their problem-solving skills and creativity.

In addition to the design charrette, the workshop included several field visits to local communities and organizations. These visits provided students with firsthand insights into the real-world challenges faced by different populations. By interacting with community members and observing their daily lives, students gained a deeper understanding of the social issues they were addressing. This experiential learning component was crucial in helping students

develop more empathetic and contextually relevant design interventions.

The workshop also emphasized the importance of sustainability in design. Students were encouraged to consider the long-term impact of their solutions and to incorporate sustainable practices into their projects. This focus on sustainability not only addressed environmental concerns but also ensured that the proposed interventions would be viable and beneficial in the long run.

By the end of the workshop, students had developed a range of innovative design solutions aimed at addressing various social issues. These projects were presented in a final exhibition, which was attended by faculty members, industry professionals, and community representatives. The exhibition provided a platform for students to share their work with a broader audience and to receive valuable feedback and recognition.

Overall, the Social Development through Design Intervention workshop was a transformative experience for the participants. It not only enhanced their design skills but also instilled a sense of social responsibility and a commitment to using their talents for the greater good. The workshop demonstrated the power of design as a tool for social change and inspired students to continue exploring ways to make a positive impact on society.

CERTIFICATE OF APPRECIATION

This is to certify that Prof. Pooja Lalit Kumar (Programme Head, M Arch Programmes at Sushant School of Art and Architecture, Sushant University, Gurugram, Haryana), has successfully led the team of faculty and students of Sushant University in providing support for the project on "*Breaking the Vicious Cycle: Planning Water Security in Low-income Urban Neighbourhoods through Co-Creation*" (funded by the Adaption Research Alliance through SouthSouthNorth Project), during the period February – March 2022.

Prof. Pooja Kumar provided expert guidance and contributed with subject knowledge on the topic of exploration. She facilitated and guided the university students in fieldwork and played an important role in initiating and promoting community engagement. Participatory Research in Asia (PRIA) expresses its gratitude to the faculty and students of Sushant University for their generous support, efforts and commitment for the said research study.

Prof. Himanshu Sanghani

Sushant School of Art and Architecture, Sushant University, India

Appreciation Letter for teaching the DfGE Course

Dear Prof. Himanshu Sanghani,

I would like to express our appreciation for your involvement in delivering the 'Designing for Greater Efficiency' (DfGE) Course - An IFC EDGE Course to design resource-efficient architecture. I also want to congratulate you and your faculty team on successfully training a cohort of 39 students in the DfGE Course during the Academic Year 2023–2024 at your institution. **Your lead role as the DfGE Course Coordinator at your institution was commendable.**

Your active participation and training of students in the DfGE course are well acknowledged. It is encouraging to note that you and your institution are committed to teaching the DfGE course to your students with a keen intent to raise their level of climate literacy and motivate them to learn how to design resource-efficient architecture.

I would like to recognize your and your institution's support of the green building movement of IFC by offering the Designing for Greater Efficiency (DfGE) program to your students.

We at IFC, look forward to more engagements and student cohorts from your institution in the future building an informed community trained in the Designing for Greater Efficiency (DfGE) course equipped for climate-responsive and resource-efficient building design.

Dr. Rohit Jigyasu
President, ICOMOS India

TO WHOM IT MAY CONCERN

It is informed that the following faculty members of Sushant University Gurugram have worked with me in for conducting study on the Social Infrastructure strategy for Gurugram. While conducting study they were instrumental in conceptualizing, policy framing and working out norms:

- Dr. Ajith Kaliyath, Associate Professor, School of Planning & Development, Sushant University.
- Ms. Aruna Bhardwaj, Architect Ekistician, Associate Professor School of Art and Architecture, Sushant University.
- Ms. Juhi Malpani Bhatt, Consulting Architect Planner, Visiting Faculty, School of Planning & Development, Sushant University.

This study is being done, since August 2019 and the draft report has been prepared and the same is being finalized. The association of above mentioned academicians and professionals for conducting the study on social infrastructure is purely voluntary and on pro-bono basis.

The intellectual contribution and perseverance of the entire team under the leadership of Prof. Dr Vibhuti Sachdev, Director-Architecture, Planning and Design, Sushant University is highly commendable and appreciable.

LETTER OF APPRECIATION

This letter is presented to express our appreciation and recognition for the outstanding contribution of your institute to the world of Architecture Education.

We are pleased to announce that *School of Art & Architecture, Sushant University, Gurugram, Haryana*, has been awarded with the **"OUTSTANDING ACHIEVER AWARD 2021"** for Education Leadership in Architecture Education.

We heartily acknowledge and congratulate School of Art & Architecture, Sushant University, Gurugram, Haryana for their superlative performance, stupendous knowledge contribution and their leadership in the area of Architecture Education. The Institute's contribution in particular, in the area of Quality Research Output by the Students/Faculty and Highly Innovative Curriculum & Teaching Methodologies is highly commendable.

We extend our Congratulations and Best wishes for this accomplishment.

PRIA

CERTIFICATE OF APPRECIATION

This is to certify that Prof. Pooja Lalit Kumar (Programme Head, M Arch Programmes at Sushant School of Art and Architecture, Sushant University, Gurugram, Haryana), has successfully led the team of faculty and students of Sushant University in providing support for the project on "*Breaking the Vicious Cycle: Planning Water Security in Low-income Urban Neighbourhoods through Co-Creation*" (funded by the Adaption Research Alliance through SouthSouthNorth Project), during the period February – March 2022.

Prof. Pooja Kumar provided expert guidance and contributed with subject knowledge on the topic of exploration. She facilitated and guided the university students in fieldwork and played an important role in initiating and promoting community engagement. Participatory Research in Asia (PRIA) expresses its gratitude to the faculty and students of Sushant University for their generous support, efforts and commitment for the said research study.

Prof. Himanshu Sanghani

Sushant School of Art and Architecture, Sushant University, India

Appreciation Letter for teaching the DfGE Course

Dear Prof. Himanshu Sanghani,

I would like to express our appreciation for your involvement in delivering the 'Designing for Greater Efficiency' (DfGE) Course - An IFC EDGE Course to design resource-efficient architecture. I also want to congratulate you and your faculty team on successfully training a cohort of 39 students in the DfGE Course during the Academic Year 2023–2024 at your institution. **Your lead role as the DfGE Course Coordinator at your institution was commendable.**

Your active participation and training of students in the DfGE course are well acknowledged. It is encouraging to note that you and your institution are committed to teaching the DfGE course to your students with a keen intent to raise their level of climate literacy and motivate them to learn how to design resource-efficient architecture.

I would like to recognize your and your institution's support of the green building movement of IFC by offering the Designing for Greater Efficiency (DfGE) program to your students.

We at IFC, look forward to more engagements and student cohorts from your institution in the future building an informed community trained in the Designing for Greater Efficiency (DfGE) course equipped for climate-responsive and resource-efficient building design.

Regards,

Autif Sayyed
