Description (min	A career counselling alumni session was successfully conducted on January 18, 2019, by Alumni of school of Business with the objective of guiding

250 to max 800 words)*	<p>students on the various opportunities available to them after graduation. This initiative was undertaken as part of the institution's efforts to enhance student preparedness for life beyond college. The session focused on three core areas: higher education pathways (both in India and abroad), preparation for competitive examinations, and direct entry into the job market. The resource person shared insightful information on how to prepare for entrance exams like CAT, GRE, UPSC, and other government services. Students were also introduced to emerging career options in domains such as data analytics, digital marketing, fintech, and entrepreneurship.</p> <p>Additionally, the speaker emphasized the importance of soft skills, resume building, interview preparation, and networking, encouraging students to begin working on these areas well in advance. The interactive nature of the session allowed students to ask questions related to their specific interests, receive personalized advice, and gain a clearer understanding of their strengths and potential career trajectories.</p> <p>Feedback collected from the attendees highlighted the usefulness of the session, with students expressing a keen interest in attending more such workshops in the future.</p> <p>Overall, the session proved to be an enriching experience for all participants and reinforced the need for structured career guidance within academic institutions. An attendance sheet of the participating students and faculty has been attached for reference.</p>

<p>Description (min 250 to max 800 words)*</p>	<p>Alumni Talks: Academics Vs. Profession of Architecture – A Workshop at Sushant School of Art and Architecture</p> <p>On a crisp afternoon at the Sushant School of Art and Architecture, students and faculty gathered for a much-anticipated workshop on the topic "Academics vs. Profession of Architecture," led by a panel of distinguished alumni. This event provided a unique opportunity for current students to engage directly with graduates who have transitioned from the classroom to professional practice. The discussions focused on the practical challenges of architecture, offering insights into how academic learning compares to the realities of working in the field. The alumni speakers, representing a range of architectural firms, shared their diverse experiences, shedding light on the dynamic relationship between education and professional practice.</p> <p>Bridging the Gap: Theory vs. Reality</p> <p>The workshop began with an open discussion on the core differences between academic architecture education and the demands of professional practice. Alumni speakers emphasized that while architectural education provides a strong theoretical foundation, it often fails to prepare students for the complex, multifaceted nature of architectural work.</p> <p>Rudraksh Charan, an alum who now runs a prominent design firm in Delhi, pointed out that architectural schools, including Sushant School, prioritize design exploration and theoretical frameworks. "In academia, we are encouraged to experiment with form, space, and aesthetics, often with little regard for budgets or timelines," he said. "However, in practice, design ideas are shaped by constraints – the building's function, cost limitations, client preferences, and even regulatory issues." He emphasized that understanding these constraints is vital for any budding architect, as they ultimately determine how a design evolves from concept to reality.</p> <p>Another alumnus, Nehit Vij, a senior architect at an international firm, echoed this sentiment. She explained that in professional practice, an architect's ability to find solutions within constraints is far more important than the ability to push boundaries of design. "While academic work tends to be more idealistic and creative, real-world projects demand that you balance creativity with practicality. As architects, we are often called upon to make decisions that are technically sound, cost-effective, and compliant with regulations," she said.</p> <p>The Role of Technical Skills</p> <p>One significant point that emerged during the workshop was the gap in technical training. While architecture students are adept at conceptualizing and designing, many graduates are less familiar with the technical aspects of construction, building systems, and site management. Ravideep Singh, a construction manager and alumnus of Sushant School, shared his experience of the steep learning curve he faced upon entering the workforce. "In school, we are not taught enough about materials, structural integrity, or construction techniques. When I started working, I was surprised by the depth of knowledge required to ensure a building stands the test of time," he said.</p>
--	--

He went on to explain that in professional practice, architects must work closely with engineers and contractors to ensure designs are structurally sound and feasible to construct. The importance of understanding technical documents, such as construction drawings and specifications, was highlighted as an essential skill for new graduates. **Rudraksh** further emphasized the importance of interdisciplinary learning, recommending that students should actively seek out courses and experiences that expose them to areas beyond design—such as structural engineering, environmental systems, and construction management—to prepare for real-world challenges.

The Value of Internships and Work Placements

The alumni also highlighted the role of internships and hands-on experience in bridging the academic-professional divide. Throughout the workshop, it was clear that real-world experience is one of the most valuable learning tools for architecture students. **Ayesha Gupta**, another alumna working as a project architect, described her own transformative experience during her internship. "Internships are the best way to understand the practicalities of architecture. In the classroom, we're often asked to focus on the beauty and concept of a design. But when you're on a site, you learn how to problem-solve, deal with client demands, work with contractors, and balance multiple stakeholders," Gupta noted. Alumni stressed the importance of gaining exposure to diverse aspects of the profession, including client interactions, project management, and team coordination. Gupta added, "Working with people from different fields—engineers, contractors, consultants—helped me realize how crucial it is to be a good communicator and team player. These are skills that schools often don't focus on enough." The workshop reinforced the notion that internships provide an invaluable opportunity for students to not only apply their academic knowledge but also to develop the soft skills necessary for professional success.

The Role of Digital Tools and Technology

Another prominent discussion topic during the workshop was the increasing importance of technology in the architecture profession. The alumni noted that the digital tools used in professional practice, such as Building Information Modeling (BIM), 3D modeling software, and parametric design tools, were not as extensively covered in the academic curriculum during their time at Sushant School. **Ankit Chopra** shared his experiences of how the firm he works at utilizes advanced digital tools for both design and project management. He suggested that Sushant School's curriculum should evolve to include more exposure to these tools, as they are now fundamental to architectural practice.

According to the alumni, digital tools are not just for enhancing design but also for improving collaboration, increasing efficiency, and ensuring accuracy in complex projects. "BIM, for example, helps architects visualize entire buildings, detect clashes, and simulate construction sequences before the actual building starts. These tools significantly streamline the process," said Sharma. The discussion encouraged students to consider self-learning or pursue workshops in these tools to stay competitive in a rapidly digitizing field.

Lifelong Learning and Adaptation

	<p>One key takeaway from the alumni workshop was the notion of "lifelong learning." All alumni emphasized that the architecture profession requires continuous education and adaptation, as technology, building codes, sustainability practices, and client expectations evolve constantly.</p> <p>Ravideep Singh reflected on the importance of staying updated with new construction methods, sustainable design principles, and regulatory changes. "The more you know, the better you can serve your clients, collaborate with your team, and design buildings that meet the ever-changing needs of society," he remarked. Additionally, alumni emphasized the value of networking and mentorship in the profession. Many successful architects, they noted, owe a part of their career development to the guidance and support they received from senior professionals during their early years.</p> <p>Conclusion</p> <p>The "Academics vs. Profession of Architecture" workshop at Sushant School of Art and Architecture provided invaluable insights into the realities of the architectural profession. Alumni offered a candid and thorough overview of how the skills and knowledge gained in academia translate into the practical demands of professional practice. They emphasized the importance of internships, technical knowledge, communication skills, and the continuous pursuit of professional development. By bridging the gap between theoretical learning and professional practice, the workshop served as an essential guide for students, encouraging them to prepare for the complexities and challenges they will face as they embark on their careers as architects.</p>

Description (min 250 to max 800 words)*	<p>The intricate relationship between diet and medicine has been a cornerstone of health discussions for centuries. As Hippocrates, the father of medicine, famously said, “Let food be thy medicine, and medicine be thy food.” This principle underscores the fundamental role diet plays in maintaining health, preventing diseases, and complementing medical treatments.</p> <p>In recent years, the integration of diet into modern medicine has gained significant attention. A well-balanced diet is not only crucial for sustaining overall health but also for managing chronic conditions such as diabetes, hypertension, and cardiovascular diseases. Alumni specializing in pharmacology, clinical nutrition, and related fields can provide valuable insights into how dietary habits can enhance or hinder the efficacy of medications. For instance, excessive consumption of grapefruit can interfere with certain drug metabolisms, while diets rich in fiber and antioxidants can support healing and immunity.</p> <p>Alumni talks on this subject can highlight the latest research linking diet and medicine, focusing on personalized nutrition and pharmacogenomics. These sessions can educate students and professionals on tailoring dietary recommendations based on genetic, metabolic, and lifestyle factors to optimize therapeutic outcomes. Furthermore, such discussions can demystify myths, such as the idea that supplements can entirely replace a</p>

	<p>nutritious diet, emphasizing that medicine works best when paired with healthy eating habits.</p> <p>The interaction between diet and medicine is particularly crucial in preventing nutrient-drug interactions. Alumni can shed light on practical approaches to counseling patients, such as advising against calcium-rich meals when taking certain antibiotics or stressing the importance of a steady intake of vitamin K for those on blood thinners.</p> <p>Alumni talks provide an opportunity to bridge academia and practical applications, fostering a deeper understanding of how diet and medicine can work synergistically to improve patient outcomes and enhance overall well-being.</p>

Description (min 250 to max 800 words)*	<p>Alumni Meet: Contribution Towards the Development of Sushant School of Art and Architecture</p> <p>The Alumni Meet held on June 20, 2019, from 10:00 AM to 12:00 PM, was a significant event for Sushant School of Art and Architecture. This gathering brought together alumni from various batches who had gone on to make notable contributions in the field of architecture and related industries. The meet focused on fostering a strong bond between the school and its alumni, while discussing how alumni could contribute to the ongoing development of the institution.</p> <p>During the event, several alumni shared their experiences and insights, highlighting how their time at Sushant School shaped their careers. Many alumni expressed their desire to give back to the school that had laid the foundation for their success. The discussions revolved around how alumni could contribute through mentorship programs, guest lectures, workshops, and internships for current students. Alumni also suggested that the school could enhance its curriculum to include emerging technologies and trends in the architecture field, preparing students for the rapidly changing professional landscape.</p> <p>Furthermore, alumni expressed their willingness to contribute to the</p>

	<p>school's infrastructure development, offering both financial and advisory support to help modernize facilities and incorporate advanced tools for students' learning. They emphasized the importance of strengthening the network of Sushant School alumni, enabling future graduates to benefit from the collective wisdom and resources of their predecessors.</p> <p>The event was a reminder of the strong community that Sushant School has built over the years, with alumni eager to support the growth and development of the institution. The Alumni Meet was a testament to the lasting impact of the school on its graduates and the continuous cycle of contribution and growth within the architectural field.</p>

<p>Description (min 250 to max 800 words)*</p>	<p>Drug awareness is a critical topic in today's society, where the misuse of substances continues to pose a significant public health challenge. An alumni meet dedicated to drug awareness serves as an excellent platform for fostering dialogue, sharing experiences, and inspiring change among students and professionals. Alumni from various fields such as pharmacy, healthcare, law enforcement, and counseling can contribute their expertise to raise awareness about the dangers of drug abuse and the importance of prevention strategies.</p> <p>One of the key aspects of such a session is education. Alumni can provide insights into the physiological, psychological, and social consequences of drug misuse. They can explain how substance abuse affects the brain's chemistry, leading to addiction, impaired judgment, and long-term health complications. Highlighting real-life cases and data can make the discussion more impactful, helping attendees understand the gravity of the issue.</p> <p>In addition, alumni talks can emphasize the importance of early intervention and the role of community engagement in curbing substance abuse. They can introduce students to the latest developments in rehabilitation, pharmacological treatments, and preventive measures. For instance, alumni working in</p>

	<p>pharmaceutical research can discuss the development of medications designed to treat addiction, such as methadone and buprenorphine.</p> <p>Another vital component of drug awareness is addressing the stigma associated with addiction. Alumni who have worked with addiction recovery programs can share stories of hope and resilience, encouraging a compassionate approach toward individuals battling substance dependency.</p> <p>Through such events, attendees can gain valuable knowledge about responsible use of prescription drugs, recognizing warning signs of abuse, and the ethical responsibilities of healthcare professionals. By promoting informed decision-making and collective responsibility, an alumni meet on drug awareness can inspire positive action and contribute to building a healthier, drug-free society.</p>

Description (min 250 to max 800 words)*

The Sushant School of Design hosted an engaging event titled *Entrepreneurship in Design: Alumni Entrepreneurs Share Their Journeys and Tips for Setting Up a Successful Design Practice*. The session brought together distinguished alumni who have carved a niche for themselves in the design industry. They shared their entrepreneurial journeys, valuable insights, and practical tips to inspire budding designers.

The discussion revolved around overcoming initial challenges, building a strong client base, and leveraging creativity for business growth. Speakers emphasized the importance of resilience, adaptability, and continuous learning in establishing a thriving design practice.

The interactive Q&A session provided students with actionable advice on branding, networking, and scaling their ventures. Real-life case studies and anecdotes made the session relatable and impactful. This event fostered a deep connection between alumni and current students, motivating the latter to explore entrepreneurial pathways in the dynamic world of design.

Description (min 250 to max 800 words)*	<p>The Alumni Meet: Degree Show, held on October 11, 2019, at the prestigious India Habitat Center from 5:00 PM until midnight, was a remarkable event that brought together the graduating class of Sushant School of Art and Architecture and its alumni in a vibrant celebration of architecture, design, and community. This event was an exciting opportunity for the school's alumni to reconnect with their alma mater, witness the work of the next generation of architects, and share their experiences with the students.</p> <p>The Degree Show, a highlight of the evening, featured the final-year students' architectural projects that were displayed in an exhibition format. The projects showcased a range of creative and innovative design solutions, demonstrating the students' growth throughout their academic journey. The exhibits included detailed models, digital renderings, and design concepts that reflected both technical proficiency and artistic flair. These projects were the culmination of years of hard work and dedication, and they allowed alumni to see firsthand the talents and capabilities of the newest batch of graduates.</p> <p>The venue, India Habitat Center, provided a fitting backdrop for the Degree Show, offering an atmosphere of sophistication and intellectual exchange. Alumni, students, and faculty mingled amidst the exhibits, discussing the design concepts and engaging in thought-provoking conversations. Many alumni took the opportunity to offer feedback and share their professional insights, offering guidance to the graduating</p>

	<p>students as they prepared to embark on their careers. These interactions served as a bridge between academia and the professional world, reinforcing the importance of mentorship and collaboration within the architectural community.</p> <p>Beyond the Degree Show itself, the evening was a celebration of the bonds that tie the alumni to their school. It was a chance for alumni to reconnect with former classmates and professors, reminiscing about their own student experiences and discussing how the school had shaped their careers. The event fostered a sense of community, with alumni sharing their journeys and offering advice to students entering the profession.</p> <p>The Alumni Meet at India Habitat Center was not only an evening of architectural celebration but also a testament to the strong, enduring network that the Sushant School of Art and Architecture has cultivated over the years. It highlighted the school's commitment to nurturing talent, fostering lifelong connections, and promoting excellence in the field of architecture.</p>

<p>Description (min 250 to max 800 words)*</p>	<p>Health and wellness are fundamental to individual and community prosperity. An alumni meet focused on promoting health offers a dynamic platform for sharing insights, experiences, and strategies to foster a healthier society. Alumni from diverse fields such as medicine, pharmacy, public health, fitness, and mental health can provide valuable perspectives on holistic approaches to well-being.</p> <p>The event can cover a wide range of topics, from preventive healthcare and the importance of regular check-ups to the benefits of a balanced diet, physical activity, and mental health support. Alumni with expertise in these areas can shed light on current health challenges and share actionable solutions. For instance, discussions on managing lifestyle diseases like diabetes, hypertension, and obesity can be especially relevant in today's fast-paced world.</p> <p>Promoting mental health awareness is another critical aspect of such a meet. Alumni who have worked in counseling or mental health advocacy can discuss the importance of destigmatizing mental health issues, recognizing signs of distress, and seeking timely professional help. Integrating mental and physical health</p>

	<p>discussions underscores the importance of a comprehensive approach to well-being.</p> <p>Additionally, alumni can introduce attendees to emerging trends in healthcare, such as personalized medicine, telemedicine, and the role of technology in improving health outcomes. They can also highlight the importance of community engagement in health promotion, encouraging students and professionals to participate in outreach programs and public health initiatives.</p> <p>Such an alumni meet not only serves as a platform for knowledge exchange but also inspires attendees to take proactive steps toward their own health and contribute to community wellness. By emphasizing the significance of healthy lifestyles and preventive care, these events can empower individuals to make informed choices and foster a culture of well-being.</p>

Description (min 250 to max 800 words)*	<p>On 15th November 2019, Sushant University organized a Blood Donation Camp with the aim of contributing towards saving lives and promoting the spirit of selfless service among students. The camp was conducted in collaboration with a reputed blood bank under proper medical supervision and with all safety protocols in place.</p> <p>The event witnessed an enthusiastic participation of 31 students, along with faculty and staff members, who came forward to donate blood voluntarily. The camp began with a brief orientation session conducted by the medical team, highlighting the importance of blood donation and clearing common myths associated with it. Students were motivated by the thought that one unit of blood can save up to three lives.</p> <p>The donation process was smooth and well-organized. Each donor underwent a preliminary health check-up to ensure they were fit for donation. Refreshments and certificates of appreciation were provided to all donors as a token of gratitude.</p> <p>The atmosphere was vibrant and filled with a sense of achievement and responsibility. The initiative not only fostered a sense of social responsibility among the students but also reinforced the university's commitment to contributing towards societal welfare.</p> <p>The Blood Donation Camp at Sushant University was a great success, reflecting the compassionate spirit of the university community. Such initiatives will continue to inspire students to be active contributors to society and embrace the value of giving.</p>

Description (min 250 to max 800 words)*	<p>The Alumni Talks: Internship & Placements Drive, held on November 21, 2019, from 11:00 AM to 1:00 PM at Sushant School of Art and Architecture, was an enriching event designed to bridge the gap between the academic environment and professional practice. This session aimed to provide valuable insights into the internship and placement processes, offering guidance to current students as they prepared to enter the competitive job market. The event brought together a panel of successful alumni who had gained significant experience in the architecture and design industry, creating an excellent opportunity for students to learn from those who had been in their shoes just a few years earlier.</p> <p>The session focused on the critical importance of internships in shaping students' professional careers. Alumni shared their own experiences, discussing how their internships had played a pivotal role in their professional development. They emphasized that internships are not just about gaining technical knowledge but also about learning the nuances of the architectural profession—working with clients, meeting deadlines, and understanding the practical challenges of design implementation. The alumni advised students to approach internships with an open mind and a willingness to learn, as these experiences would provide them with a deeper understanding of the architectural field beyond what is taught in the classroom. Moreover, the alumni spoke about the challenges and</p>

	<p>opportunities in securing placements. Many shared tips on building a strong portfolio, honing soft skills like communication and teamwork, and making meaningful connections within the industry. They also highlighted the importance of a proactive approach—whether it be through networking, leveraging social media platforms like LinkedIn, or attending career fairs and industry events. Alumni spoke about how these proactive efforts had helped them land their first job after graduation, and they encouraged students to start building their professional network early in their academic journey. The Internship & Placements Drive also allowed students to ask questions and engage in one-on-one discussions with the alumni, making it a highly interactive session. The insights provided were invaluable for students looking to navigate the transition from education to professional practice. The session reinforced the significance of internships and placements in launching a successful architectural career, while also fostering a sense of community between the school's alumni and its current students.</p>

Description (min 250 to max 800 words)*	<p>In modern medicine, this connection has gained renewed attention. A well-balanced diet is essential not only for overall health but also for managing chronic conditions like diabetes, hypertension, and cardiovascular diseases. Alumni with expertise in pharmacology and clinical nutrition can offer valuable insights into how dietary habits influence medication effectiveness. For instance, excessive grapefruit intake can disrupt drug metabolism, while diets rich in fiber and antioxidants promote healing and immunity.</p> <p>Alumni talks can explore advancements in personalized nutrition and pharmacogenomics, helping students and professionals understand how to tailor dietary recommendations based on individual genetics, metabolism, and lifestyle. These discussions also dispel common myths, such as the belief that supplements can replace a nutritious diet, emphasizing that medicine is most effective when complemented by healthy eating habits.</p> <p>Understanding the interaction between diet and medicine is crucial to prevent nutrient-drug conflicts. Alumni can provide practical counseling strategies, such as avoiding calcium-rich meals with certain antibiotics or maintaining consistent vitamin K intake for patients on blood thinners.</p>

	Such sessions bridge the gap between academic knowledge and practical application, fostering a deeper appreciation of how diet and medicine can synergistically enhance patient outcomes and overall well-being.

Description (min 250 to max 800 words)*	<p>Education is a key focus of such sessions. Alumni can provide valuable insights into the physiological, psychological, and social effects of substance misuse, illustrating how it impacts brain chemistry, fosters addiction, and leads to long-term health challenges. Sharing real-life examples and data can make these discussions relatable and help attendees understand the severity of the issue.</p> <p>Alumni talks can highlight the importance of early intervention and the role of community involvement in addressing substance abuse. They can discuss advancements in addiction treatments, such as methadone and buprenorphine, and explore preventive measures and awareness initiatives that empower individuals to make healthier choices.</p>

	<p>Another crucial aspect is tackling the stigma surrounding addiction. Alumni with experience in recovery programs can share stories of resilience and transformation, encouraging empathy and a compassionate attitude toward individuals struggling with dependency.</p> <p>These events also provide practical knowledge on responsible prescription drug use, recognizing early signs of abuse, and the ethical responsibilities of healthcare professionals in managing substance-related issues.</p> <p>By fostering awareness, informed decision-making, and a sense of collective responsibility, an alumni meet on drug awareness can inspire meaningful action and contribute to creating a healthier, drug-free community.</p>

Description (min 250 to max 800 words)*	<p>Alumni Talks: Career Planning, July 28, 2020</p> <p>The Alumni Talks: Career Planning session, held on July 28, 2020, from 2:00 PM to 4:00 PM at Sushant School of Art and Architecture, offered a valuable opportunity for students to gain insights into planning and navigating their future careers in architecture. The event brought together a distinguished panel of alumni, who shared their personal career journeys, challenges, and the strategies they used to establish successful careers in the field.</p> <p>The session focused on the importance of early career planning, with alumni offering practical advice on how students can approach the transition from academic life to professional practice. They discussed the significance of building a strong portfolio, gaining hands-on experience through internships, and developing a network of professional connections that would support career growth. Several alumni emphasized that architecture is not just about design, but also about adaptability, continuous learning, and exploring diverse areas within the profession, such as urban planning, sustainability, and interior design.</p> <p>In addition, the alumni shared their experiences of dealing with career uncertainties, including how they overcame initial setbacks, identified their areas of passion, and found opportunities that aligned with their personal and professional goals. They highlighted the importance of staying open-minded and being proactive in seeking out opportunities, whether through internships, freelancing, or engaging in collaborative projects.</p> <p>The interactive nature of the session allowed students to ask questions, seek guidance, and discuss their own career aspirations with the alumni.</p>

	<p>This facilitated a deeper understanding of the architectural profession and provided students with valuable tools to make informed decisions about their career paths.</p> <p>Overall, the Career Planning talk was an empowering session that equipped students with the necessary knowledge and confidence to successfully chart their course in the competitive world of architecture.</p>

Description (min 250 to max 800 words)*

Sushant School of Design hosted an engaging online session titled *"Innovative Workspaces: Designing for Post-Pandemic Needs"* led by its accomplished alumni. The event explored the transformative shifts in workspace design triggered by the pandemic. Alumni speakers highlighted key trends, including hybrid work models, biophilic design, flexible layouts, and technology integration for enhanced collaboration and productivity.

The session underscored the importance of creating employee-centric environments that support mental well-being and physical health, while addressing the growing emphasis on sustainability. Case studies and real-world examples brought these concepts to life, offering valuable insights into current challenges and opportunities in workspace design.

The event concluded with a lively Q&A session, inspiring students and professionals to rethink how design can shape the future of work. This initiative reflects the institution's commitment to fostering dialogue around contemporary design challenges and solutions.

Description (min 250 to max 800 words)*	<p>Alumni Meet: Founder's Day & Career Drive, September 4, 2020</p> <p>The Alumni Meet: Founder's Day & Career Drive, held on September 4, 2020, from 9:00 AM to 5:00 PM at Sushant School of Art and Architecture, was a day of celebration, reflection, and professional development. The event marked an important occasion to honor the founding vision of the school, while also providing a platform for current students to connect with alumni and explore career opportunities in the field of architecture.</p> <p>The day's events began with a heartfelt celebration of the school's founding principles, with alumni sharing their experiences of how the institution helped shape their careers and fostered a sense of community. This reflection on the school's journey helped students understand the legacy they are now a part of and the ongoing commitment to excellence in architectural education.</p> <p>The Career Drive, an essential part of the event, allowed students to engage directly with alumni and industry professionals, learning about the various career pathways in architecture and related fields. Alumni from diverse areas of architectural practice, including design, urban planning, and construction management, shared their career journeys and offered guidance on how students could navigate the transition from academics to professional life. They discussed the importance of building a strong portfolio, securing internships, and gaining hands-on experience, while also emphasizing the value of networking and continuous learning.</p> <p>Throughout the day, students had the opportunity to interact with alumni, ask questions, and seek advice on internships and job placements. The event was a valuable experience for students, providing them with</p>

	insights into potential career opportunities and practical tips for entering the competitive job market. The Founder's Day & Career Drive not only celebrated the school's rich history but also fostered a sense of community, helping students build connections that will support their future careers in architecture.

Description (min 250 to max 800 words)*

These events can cover a wide range of topics, including the importance of preventive healthcare, regular medical check-ups, balanced diets, physical activity, and mental health care. Alumni experts can shed light on the growing health challenges of modern life, such as lifestyle diseases like diabetes, hypertension, and obesity, while offering actionable solutions to manage and prevent these conditions.

A key component of such an event is raising awareness about mental health. Alumni with experience in mental health advocacy and counseling can discuss the importance of destigmatizing mental health issues, recognizing early signs of distress, and promoting the benefits of seeking professional help. Addressing both physical and mental health emphasizes the importance of a comprehensive approach to well-being.

Furthermore, alumni can introduce attendees to emerging trends in healthcare, such as telemedicine, personalized medicine, and the role of technology in improving health outcomes. They can also highlight the importance of

	<p>community engagement, encouraging participants to get involved in public health initiatives and outreach programs.</p> <p>Ultimately, alumni meets on health and wellness inspire attendees to adopt healthier habits and contribute to building a stronger, more informed community committed to well-being.</p>

<p>Description (min 250 to max 800 words)*</p>	<p>A central focus of these talks is educating attendees about the physiological, psychological, and social consequences of drug abuse. Alumni can explain how substance misuse alters brain chemistry, leads to addiction, and creates long-term health problems. Real-life examples and data help make these discussions more impactful, allowing participants to grasp the gravity of the issue and understand its broader societal implications.</p> <p>In addition, alumni talks emphasize the importance of early intervention and prevention strategies. They can introduce the latest advancements in drug treatment, such as pharmacological therapies like methadone and buprenorphine, and share successful public health initiatives. These sessions also provide a platform to discuss the critical role of community involvement and support in combating substance abuse.</p> <p>Addressing the stigma surrounding addiction is another key aspect. Alumni who have worked in recovery programs can share stories of hope and resilience, encouraging empathy and a compassionate approach toward those struggling with addiction.</p> <p>Overall, alumni talks on drug education provide an opportunity for informed decision-making and collective responsibility. By</p>

	equipping attendees with knowledge and fostering a supportive attitude, these talks contribute to building a healthier, drug-free society.

Description (min 250 to max 800 words)*	<p>Alumni Meet: Internship & Placements Drive, January 29, 2021</p> <p>The Alumni Meet: Internship & Placements Drive, held on January 29, 2021, was an essential event for the students of Sushant School of Art and Architecture, aimed at bridging the gap between academic learning and professional practice. This session provided an invaluable opportunity for students to gain insights from alumni who have successfully navigated the transition from school to the professional world. The event allowed students to explore potential career opportunities, internships, and placements while learning from the experiences of those who had once walked the same path.</p> <p>During the session, alumni shared their personal journeys, highlighting the role of internships in shaping their careers. They discussed how hands-on experience in various architectural firms helped them refine their skills, understand real-world challenges, and enhance their professional development. Alumni also emphasized the importance of internships as a gateway to employment, advising students to be proactive in seeking opportunities that would provide exposure to diverse areas of architecture, from design to construction management.</p> <p>The Alumni Meet also served as a platform for students to network with industry professionals. Alumni provided tips on creating strong portfolios, navigating job interviews, and building meaningful connections within the architecture industry. Many alumni also spoke about the evolving nature of the architecture profession, offering advice on how students can stay updated with new technologies, sustainability practices, and industry trends.</p> <p>By the end of the session, students had gained a clearer understanding of the professional landscape, equipped with practical advice and knowledge that would help them in securing internships and job placements. The Internship & Placements Drive fostered a sense of community, strengthening the connection between alumni and current students, and helping to pave the way for a successful future in architecture.</p>

Description (min 250 to max 800 words)*	<p>The connection between diet and medicine has been a cornerstone of health discussions for centuries. Hippocrates, the father of medicine, famously stated, “Let food be thy medicine, and medicine be thy food,” emphasizing the crucial role of diet in maintaining health, preventing disease, and complementing medical treatments.</p> <p>In recent years, the role of diet in modern medicine has gained significant recognition. A balanced diet is essential not only for overall health but also for managing chronic conditions like diabetes, hypertension, and cardiovascular diseases. Alumni with expertise in pharmacology, clinical nutrition, and related fields can offer valuable insights into how diet can influence the effectiveness of medications. For example, excessive grapefruit consumption can interfere with the metabolism of certain drugs, while diets rich in fiber and antioxidants can enhance healing and immunity.</p> <p>Alumni talks can focus on the latest research connecting diet and medicine, particularly personalized nutrition and pharmacogenomics. These sessions can educate students and</p>

	professionals on customizing dietary recommendations based on genetic, metabolic, and lifestyle factors to improve therapeutic outcomes. Additionally, such discussions can debunk common myths, like the idea that supplements can fully replace a nutritious diet, reinforcing that the best results occur when medicine is combined with healthy eating habits. Understanding the interaction between diet and medicine is crucial for preventing nutrient-drug interactions. Alumni can provide practical advice, such as avoiding calcium-rich foods when taking certain antibiotics or ensuring consistent vitamin K intake for those on blood thinners.

Description (min 250 to max 800 words)*	<p>The Alumni Talks: Building Information & Management session, held on March 25, 2021, from 2:00 PM to 4:00 PM, was an insightful event that provided Sushant School of Art and Architecture students with an in-depth understanding of Building Information Modeling (BIM) and its critical role in modern architectural practice. The session brought together distinguished alumni working in the field of architecture, construction, and project management to share their expertise on the integration of technology in building design, construction, and management. During the session, alumni emphasized the transformative impact of BIM on the architecture, engineering, and construction (AEC) industries. They explained how BIM allows architects, engineers, and construction professionals to collaborate more efficiently, reduce errors, and enhance the overall quality of design and construction processes. The alumni shared their real-world experiences, detailing how BIM has streamlined project workflows, improved project coordination, and optimized resource management.</p> <p>The talk also explored the growing demand for BIM proficiency in the job market. Alumni discussed how learning and mastering BIM tools had enhanced their careers, making them highly competitive in the industry. They encouraged students to develop their BIM skills, as it is becoming an essential part of architectural practice. Several alumni also shared insights into specific BIM software, highlighting key tools like Autodesk Revit, Navisworks, and other digital platforms used for modeling, simulation, and project management. In addition to the technical aspects, the alumni also touched upon the collaborative nature of BIM, underscoring the importance of communication and teamwork in successfully implementing BIM across architectural projects. The event was an excellent opportunity for students to gain practical knowledge, ask questions, and learn how to incorporate BIM into their academic and professional journeys. It reinforced the importance of adapting to technological advancements to remain relevant and competitive in the ever-evolving field of architecture.</p>

Description (min 250 to max 800 words)*	<p>School of Engineering conducted a Virtual Alumni meet-21 on 10th April 2021. Participation of alumni was from various parts of the world. It was fun filled event with the cultural performances showcased by current students and Alumni. The musical session by a renowned singer took everyone to yesteryear. Fun-filled games made the event more interactive. The Highlight of the evening was the Alumni and teachers sharing and reliving their memories and experiences of the golden days.</p>

Description (min 250 to max 800 words)*	<p>The connection between diet and medicine has been a cornerstone of health discussions for centuries. Hippocrates, the father of medicine, famously stated, "Let food be thy medicine, and medicine be thy food," emphasizing the crucial role of diet in maintaining health, preventing disease, and complementing medical treatments. In recent years, the role of diet in modern</p>

	<p>medicine has gained significant recognition. A balanced diet is essential not only for overall health but also for managing chronic conditions like diabetes, hypertension, and cardiovascular diseases. Alumni with expertise in pharmacology, clinical nutrition, and related fields can offer valuable insights into how diet can influence the effectiveness of medications. For example, excessive grapefruit consumption can interfere with the metabolism of certain drugs, while diets rich in fiber and antioxidants can enhance healing and immunity.</p> <p>Alumni talks can focus on the latest research connecting diet and medicine, particularly personalized nutrition and pharmacogenomics. These sessions can educate students and professionals on customizing dietary recommendations based on genetic, metabolic, and lifestyle factors to improve therapeutic outcomes. Additionally, such discussions can debunk common myths, like the idea that supplements can fully replace a nutritious diet, reinforcing that the best results occur when medicine is combined with healthy eating habits.</p> <p>Understanding the interaction between diet and medicine is crucial for preventing nutrient-drug interactions. Alumni can provide practical advice, such as avoiding calcium-rich foods when taking certain antibiotics or ensuring consistent vitamin K intake for those on blood thinners.</p> <p>Alumni talks offer a valuable opportunity to bridge academic knowledge with practical application, deepening the understanding of how diet and medicine work together to improve patient outcomes and overall well-being.</p> <p>Through such events, attendees can gain valuable knowledge about responsible use of prescription drugs, recognizing warning signs of abuse, and the ethical responsibilities of healthcare professionals. By promoting informed decision-making and collective responsibility, an alumni meet on drug awareness can inspire positive action and contribute to building a healthier, drug-free society.</p>

Description (min 250 to max 800 words)*	<p>School of Business, Sushant University conducted a One-day workshop on "DIGITAL TRANSFORMATION SESSION" for its students on 09-10-2021.</p> <p>The Objectives of the Session: The objective of the Digital Transformation Session is to provide participants with a comprehensive understanding of how digital technologies can be leveraged to drive innovation, enhance efficiency, and create value for organizations. The session aims to equip individuals and businesses with the knowledge, strategies, and tools needed to adapt to and thrive in the digital age.</p>

ABOUT THE SESSION:

This session focused on empowering individuals and organizations to understand and embrace digital transformation. By exploring the integration of advanced technologies into business processes, participants will gain insights into driving innovation, improving efficiency, and creating value in today's digital economy. The key points are a clear understanding of digital transformation and its components, practical strategies for integrating digital tools and technologies, insights into creating customer-centric and efficient processes, inspiration from real-world examples to apply in their own organizations, a personalized action plan to begin the digital transformation journey.

Description (min 250 to max 800 words)*	<p>The Alumni Talks: Career Planning session, held on July 28, 2021, from 2:00 PM to 4:00 PM, provided invaluable guidance to students of Sushant School of Art and Architecture as they prepared to step into the professional world. This session brought together a group of accomplished alumni who shared their career journeys, offering practical advice and strategies to help students plan their own paths in the architecture and design fields.</p> <p>The alumni highlighted the importance of proactive career planning and shared insights into how they navigated their professional growth after graduation. They discussed the significance of setting clear career goals, gaining diverse work experience, and continuously updating skills to remain competitive in a rapidly evolving industry. Alumni emphasized the value of internships, mentorship, and networking as key factors in securing the first job and building a successful career.</p> <p>Additionally, the session addressed the different career paths within the architecture field. Alumni discussed various specializations such as urban planning, interior design, project management, and sustainable architecture, providing students with a broader perspective of the opportunities available to them. They also shared insights into emerging trends in architecture, such as the growing emphasis on sustainable design and the increasing role of technology in the profession.</p> <p>The session was highly interactive, with students asking questions and seeking personalized advice. The alumni shared their experiences of overcoming challenges, handling uncertainties, and finding their niche in the profession, offering inspiration and practical tips to students at the start of their careers.</p> <p>The Career Planning talk was an excellent opportunity for students to receive mentorship, gain clarity on their career aspirations, and develop the confidence and strategies needed to succeed in the competitive architectural landscape.</p>

Description (min 250 to max 800 words)*	<p>The Alumni Meet: Founder's Day & Career Drive, held on September 3, 2021, from 9:00 AM to 5:00 PM at Sushant School of Art and Architecture, was a vibrant and inspiring event that brought together the school's alumni, students, and faculty. The day was dedicated to celebrating the founding vision of the institution, while also providing a platform for students to explore career opportunities and network with alumni working across various fields of architecture.</p> <p>The event kicked off with a celebration of the school's history and legacy, where alumni shared how their time at Sushant School had shaped their careers. The Founder's Day celebration was a reflection on the institution's core values, which continue to influence the education of future architects. Alumni expressed gratitude for the strong foundation laid during their time at the school and how it has contributed to their success in the professional world.</p> <p>The Career Drive, which was the focal point of the event, allowed students to engage directly with alumni and industry professionals. Alumni discussed various career paths within architecture, from design and urban planning to project management and sustainable architecture. Students received valuable advice on how to create standout portfolios, secure internships, and approach the job market with confidence. The career discussions also emphasized the importance of networking and leveraging platforms like LinkedIn to make connections in the architecture industry.</p> <p>Throughout the day, students had the opportunity to ask questions, seek mentorship, and gain insights into the evolving architecture profession. The event fostered a sense of community and strengthened the bond between current students and alumni, ensuring the continuous support and guidance necessary for students to thrive in their future careers.</p>

<p>Description (min 250 to max 800 words)*</p>	<p>Health and wellness are essential for both individual and community success. An alumni meet focused on promoting health serves as an engaging platform for sharing insights, experiences, and strategies to create a healthier society. Alumni from fields like medicine, pharmacy, public health, fitness, and mental health can offer valuable perspectives on holistic approaches to well-being.</p> <p>The event can cover a broad range of topics, including preventive healthcare, the importance of regular check-ups, and the benefits of a balanced diet, physical activity, and mental health care. Alumni with expertise in these areas can address current health challenges and offer practical solutions. For example, discussions about managing lifestyle diseases such as diabetes, hypertension, and obesity are highly relevant in today's fast-paced society.</p> <p>Mental health awareness is another crucial aspect of such a meet. Alumni with experience in counseling or mental health advocacy can highlight the importance of de-stigmatizing mental health</p>

	<p>issues, recognizing signs of distress, and seeking timely professional help. By integrating discussions on both mental and physical health, the event emphasizes the need for a comprehensive approach to well-being.</p> <p>Alumni can also introduce emerging healthcare trends, such as personalized medicine, telemedicine, and the role of technology in improving health outcomes. They can stress the significance of community engagement, encouraging students and professionals to participate in public health initiatives and outreach programs.</p> <p>This alumni meet not only serves as a knowledge-sharing platform but also motivates attendees to take proactive steps toward their own health and contribute to broader community wellness. By focusing on healthy lifestyles and preventive care, these events empower individuals to make informed decisions and promote a culture of well-being.</p>

<p>Description (min 250 to max 800 words)*</p>	<p>An alumni meet dedicated to drug education provides a valuable platform for fostering awareness, sharing knowledge, and inspiring action. Alumni from diverse fields such as healthcare, pharmacy, law enforcement, and counseling can offer their expertise to highlight the dangers of drug abuse and emphasize the importance of prevention.</p> <p>These sessions focus on educating attendees about the physiological, psychological, and social consequences of substance misuse. Alumni can explain how drugs affect brain chemistry, leading to addiction, impaired judgment, and long-term health issues. By sharing real-life cases and data, they can make these discussions more relatable and impactful, helping participants understand the gravity of the problem.</p>

	<p>Furthermore, alumni can emphasize the importance of early intervention, community involvement, and access to rehabilitation. They can introduce recent developments in drug treatment, such as pharmacological therapies, and stress the importance of preventive measures.</p> <p>Alumni can also address the stigma associated with addiction, sharing stories of recovery and resilience. This fosters empathy and encourages a compassionate approach toward those affected by substance misuse.</p> <p>Ultimately, drug education alumni meets empower attendees to make informed decisions, raising awareness and contributing to a healthier, drug-free community.</p>

Description (min 250 to max 800 words)*	School of Engineering conducted a Session by our alumni Nitish Goel who works as 'Software developer' at Microsoft on 23 rd December 2021. Nitish addressed first and second year students on how to crack interviews in top MNCs. Being a software developer at Microsoft, he shared tricks and tips with students. Students of computer science and engineering were quite interested in knowing about the challenges being posed at the time of interview. Also Nitish shared the information about 'most sought after' areas in the field of computers engineering. He shared hot topics that are discussed in the corporate now a days.

Description (min 250 to max 800 words)*	<p>School of engineering and technology keeps organizing Alumni meets every year consistently. The idea is to create a platform for the passed out students, teachers and current students to come together, share their ideas about new advancements in the technological environment, have fun, relive their old moments.</p> <p>On 15th January 2022, SET organized alumni meet. The event was created online, on google meet. Students offered everyone with solo singing event, musical instrument play, shayrai by Mr. Tanishq and few one minute games to entertain everyone.</p> <p>The event initiated with the message from our worthy Dean Dr. Sudipto Sarkar. The students were given a glimpse of last year's activities by Ms. Inderjeet kaur, showcasing the initiatives taken up by the school where alumni and current students can exchange mutual efforts and wisdom.</p> <p>The event was concluded by the thanks speech given by the organizers.</p>

Description (min 250 to max 800 words)*	<p>The Alumni Meet: Internship & Placements Drive, held on January 28, 2022, from 2:00 PM to 4:00 PM at Sushant School of Art and Architecture, served as a vital platform for students to connect with alumni and industry professionals, gaining key insights into the professional world of architecture. The event focused on preparing students for internships and job placements, providing them with the knowledge and resources needed to kickstart their careers.</p> <p>Alumni from diverse fields of architecture shared their personal experiences and career journeys, offering valuable advice on how to successfully navigate the transition from academics to professional practice. They discussed the significance of internships as an essential stepping stone in gaining practical experience, learning industry standards, and building a professional network. Several alumni emphasized how internships had played a crucial role in their own careers, offering hands-on opportunities that helped them refine their skills and enhance their portfolios.</p> <p>The session also offered practical guidance on how to effectively search for internships and job placements. Alumni provided tips on creating standout resumes and portfolios, along with strategies for succeeding in interviews. They stressed the importance of gaining exposure to different architectural fields, whether in design, urban planning, or construction management, and how internships can lead to full-time job offers.</p> <p>Students were encouraged to take a proactive approach by networking, attending career fairs, and engaging with alumni on professional platforms like LinkedIn. The event allowed students to ask questions, receive mentorship, and build relationships with alumni who were eager to offer support and guidance.</p> <p>Overall, the Internship & Placements Drive was a highly beneficial event, equipping students with the tools and confidence to take the next step in their architectural careers.</p>

Description (min 250 to max 800 words)*	<p>The Legal Challenges in the Gig Economy workshop explored the complexities of employment law as it applies to gig workers, freelancers, and contractors. The gig economy has dramatically transformed the workforce, as more individuals opt for flexible, short-term jobs through platforms like Uber, Airbnb, and Freelancer.com. A major focus of the</p>

	<p>workshop was the classification of workers—whether they should be categorized as independent contractors or employees. This classification has significant implications for benefits, wages, and labor rights. A central issue discussed was the lack of worker protections for gig economy workers. Unlike full-time employees, gig workers are not entitled to benefits such as health insurance, paid leave, or workers' compensation. The workshop emphasized the growing demand for legislation that would provide these protections, while also acknowledging the unique nature of gig work that does not fit traditional employment models. Legal professionals discussed potential legal reforms, including the creation of a new classification of worker that offers some, but not all, of the protections enjoyed by full-time employees.</p> <p>The session also delved into the tax implications of gig work, as many workers are required to file as independent contractors, often without the assistance of an employer. The complexities of tax filings and the lack of employer-supplied tax withholdings can lead to confusion and errors. Another key topic was dispute resolution, as gig workers often face difficulties when contesting issues such as wrongful termination or payment disputes.</p> <p>The workshop concluded by stressing the need for comprehensive legal reform that balances the flexibility of the gig economy with the protection of worker rights. As the gig economy continues to grow, lawmakers and legal professionals must work together to create a fairer and more equitable framework for gig workers.</p>

Description (min 250 to max 800 words)*	<p>The Mentorship Café, organized by the alumni of School of Design, served as an engaging platform for one-on-one and small-group mentoring sessions, fostering invaluable connections between current students and alumni. Held in a vibrant, collaborative setting, the event encouraged meaningful dialogue, where students gained insights into industry trends, career paths, and professional challenges directly from experienced alumni.</p> <p>This initiative created a bridge between academia and industry, equipping students with practical knowledge, confidence, and clarity about their aspirations. Alumni mentors shared personal journeys, offered constructive feedback on portfolios, and guided students on navigating professional landscapes.</p> <p>The Mentorship Café underscored the strong community spirit of the Sushant School of Design, inspiring attendees with stories of success and perseverance. By empowering students with tailored advice and networking opportunities, the event reinforced the school's commitment to fostering mentorship and lifelong learning among its vibrant design community.</p>

Description (min 250 to max 800 words)*	<p>The Student Council of School of Design, Sushant University, organized <i>Designathon 2024</i>, a 6-hour collaborative design challenge, on 4th March 2022. Students formed multidisciplinary teams and tackled real-world challenges in sustainability, user experience, and social design. Guided by expert mentors, they brainstormed, ideated, and created prototypes. Workshops on rapid prototyping and effective pitching were held to enhance participants' skills.</p> <p>The highlight was the final presentation to a jury of industry experts, who evaluated projects based on creativity, feasibility, and impact. <i>Designathon 2024</i> not only showcased the students' creativity but also strengthened their problem-solving abilities, emphasizing the role of design in driving meaningful change. The event concluded with applause for the students' efforts and plans for future editions.</p>

Description (min 250 to max 800 words)*	<p>In recent years, mental health has gained significant attention, highlighting the urgent need for effective treatments. Advances in psychopharmacology, such as selective serotonin reuptake inhibitors (SSRIs) for depression and anxiety, and atypical antipsychotics for schizophrenia, have brought relief to millions worldwide. These medications have not only improved symptom management but have also enhanced patients' quality of life.</p> <p>We will also discuss the groundbreaking strides in personalized medicine, where genetic and biochemical markers guide treatment strategies, reducing trial-and-error prescribing. Innovations like long-acting injectables are addressing adherence issues, particularly in chronic conditions.</p> <p>Another exciting frontier is the resurgence of psychedelic compounds, including psilocybin and MDMA, for treatment-resistant depression and PTSD. Clinical trials are demonstrating their transformative potential when combined with psychotherapy.</p>

	<p>Despite these advancements, challenges remain. Stigma around mental health, high costs of new treatments, and accessibility issues hinder widespread adoption. By addressing these barriers and fostering innovation, the pharmaceutical field can continue to reshape mental health care, ensuring a brighter future for those affected by mental illness.</p> <p>This session will delve into these advancements while addressing the challenges of stigma, cost, and accessibility. Together, we'll explore how these innovations are shaping the future of mental health care and the role our alumni can play in driving progress.</p>

Description (min 250 to max 800 words)*	<p>The Alumni Talks: AR, MR, and VR Tools in Architecture, held on March 25, 2022, from 2:00 PM to 4:00 PM at Sushant School of Art and Architecture, provided a fascinating exploration of how advanced digital tools like Augmented Reality (AR), Mixed Reality (MR), and Virtual Reality (VR) are transforming the field of architecture. The event featured a panel of alumni who are pioneers in incorporating these cutting-edge technologies into their architectural practices.</p> <p>The session began with alumni sharing their professional experiences using AR, MR, and VR tools in architectural design and project visualization. They explained how these technologies enable architects to create more immersive, interactive, and realistic models of their designs, allowing both clients and designers to engage with architectural concepts in innovative ways. Through AR and VR, architects can present 3D models that can be navigated virtually, providing an unprecedented sense of scale and spatial awareness. MR combines real and virtual environments, enabling users to interact with both physical and digital elements simultaneously, offering new opportunities for collaborative design processes.</p> <p>The alumni emphasized how these technologies have revolutionized client presentations, enabling stakeholders to experience a building design before it is constructed. They also discussed how AR, MR, and VR tools are being used for design optimization, helping architects identify potential issues and make informed decisions early in the design process. The session also highlighted the increasing importance of mastering these technologies in today's competitive architectural landscape. Alumni encouraged students to familiarize themselves with AR, MR, and VR software to enhance their design processes and stay ahead in the industry.</p> <p>Overall, the Alumni Talks provided students with valuable insights into the integration of immersive technologies in architecture, inspiring them to explore the future of design and innovation in their careers.</p>

Description (min 250 to max 800 words)*	<p>his session will highlight how technological breakthroughs, such as wearable devices, artificial intelligence (AI), and telemedicine, are empowering both patients and healthcare providers. Smartwatches and wearable monitors are enabling real-time heart health monitoring, helping in the early detection of arrhythmias and other anomalies, thus preventing severe cardiac events.</p> <p>Advancements in pharmaceutical sciences, including novel anticoagulants and lipid-lowering agents, are improving</p>

	<p>outcomes for conditions like atrial fibrillation and hypercholesterolemia. Additionally, drug-eluting stents and innovations in heart valve replacements are revolutionizing interventional cardiology, ensuring better recovery and long-term success.</p> <p>We will also explore the role of AI-driven diagnostics, which are enhancing precision in interpreting imaging studies and identifying high-risk patients. Moreover, the increasing adoption of telecardiology has bridged geographical gaps, providing timely care to underserved populations.</p> <p>The session will further delve into emerging trends, such as robot-assisted surgeries and the integration of big data in cardiovascular research. We'll address challenges of accessibility, affordability, and ethical considerations while reflecting on the pivotal role of alumni in advancing cardiovascular care through innovation and collaboration.</p>

<p>Description (min 250 to max 800 words)*</p>	<p>Vatel Hotel & Tourism Business School, Sushant University on Wednesday, December 15, 2022 conducted a virtual meet of its students belonging to all pass out Batches, just in order to update them</p>

	about the various happenings and to generally talk about how they were feeling about either getting into the corporate world or how they were dealing with their new enterprises. The students were thankful about the way the college conducted the academics of their course and took care about their on-the-job practical sessions and internships. "We enjoyed being under the care and attention of our professors who made sure that we all succeed and that we achieved the goals for which we took up this great hotel management course" says Apurva Dubey who works as a customer relations executive at a travel firm. Another student says "Our teachers were tough with us but that is what transformed us into thorough professionals now. The Vatel Connect is an informal, open forum in which students are free to express all that they feel about their college, the teachers and the about the university. Students who passed out even 7 years ago are in regular touch and do visit the university to see the transformation from time to time.

Description (min 250 to max 800 words)*	<p>The Alumni Talks: Career Planning, held on July 29, 2022, from 2:00 PM to 4:00 PM at Sushant School of Art and Architecture, provided an invaluable opportunity for students to gain insights from successful alumni about shaping their professional paths in architecture. The session focused on practical strategies for planning a successful career, helping students understand the steps required to transition from academia to professional practice in the dynamic field of architecture.</p> <p>During the session, alumni shared their personal career journeys, including the challenges they faced and the decisions that shaped their professional growth. They emphasized the importance of setting clear, realistic goals and taking proactive steps toward achieving them. The alumni discussed how internships, networking, and continuous learning played critical roles in advancing their careers. They highlighted the value of being adaptable and open to diverse opportunities within architecture, whether in design, urban planning, project management, or sustainability.</p> <p>The session also offered advice on building a strong portfolio, which is a key tool for securing jobs and internships in architecture. Alumni shared tips on how to showcase one's skills and creativity, making a portfolio stand out to potential employers. They also discussed the significance of maintaining a professional online presence, including platforms like LinkedIn, to connect with industry professionals and stay informed about job opportunities.</p> <p>Additionally, the alumni spoke about the importance of resilience and staying motivated in the face of setbacks, encouraging students to stay focused on their long-term goals.</p> <p>Overall, the Career Planning talk was an engaging and informative session, offering students valuable insights, mentorship, and guidance to help them navigate the competitive world of architecture and successfully launch their careers.</p>

Description (min 250 to max 800 words)*

The Student Council of School of Design successfully organized a series of **Skill-Building Workshops**, aimed at equipping students with cutting-edge tools and techniques essential for modern design practices. The council played a pivotal role in planning and executing this event, from identifying trending topics such as **Digital Sketching with Procreate**, **3D Printing Basics**, and **AR/VR for Design**, to coordinating with faculty and external professionals.

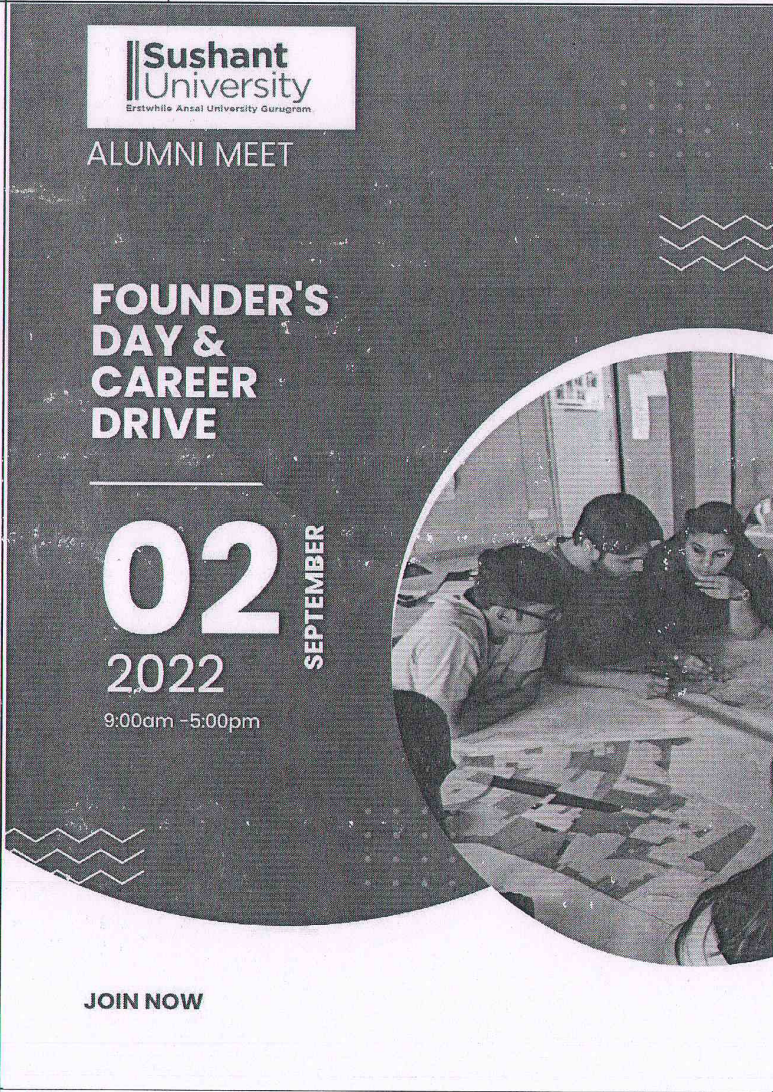

The workshops were structured as hands-on sessions, allowing participants to actively engage and learn through practical exercises. The council meticulously managed logistics, including scheduling, securing resources, and promoting the event through creative campaigns across digital platforms.

Student-led volunteers ensured seamless execution, assisting facilitators and addressing participant queries. The workshops received an overwhelming

	<p>response, fostering skill enhancement and peer collaboration. The council's efforts not only bridged gaps in technical knowledge but also showcased their leadership and ability to drive impactful initiatives.</p>

Description (min 250 to max 800 words)*	<p>Alumni Meet: A Day of Celebration and Opportunity</p> <p>On September 2, 2022, Sushant School of Art and Architecture hosted a successful Alumni Meet that celebrated Founder's Day and featured a vibrant Career Drive. The event brought together a diverse group of alumni, faculty, staff, and students for a day of networking, reminiscing, and exploring career possibilities.</p> <p>The day began with a heartfelt commemoration of the institution's founder, acknowledging their vision and the lasting impact they have had on the institution's growth and success. This was followed by a lively Career Drive, where leading companies showcased exciting employment opportunities. Attendees had the chance to connect with recruiters, learn about career paths, and gain valuable industry insights through interactive sessions and workshops.</p> <p>The event also provided a platform for alumni to reconnect with their alma mater and fellow graduates. The campus tour allowed alumni to relive cherished memories and witness the significant transformations that have taken place since their time as students. Engaging discussions with esteemed alumni and industry experts provided valuable insights and career guidance. The Alumni Meet was a resounding success, fostering a strong sense of community and providing valuable opportunities for both alumni and current students. The event served as a testament to the enduring legacy of the institution's founder and the bright future that lies ahead for its graduates.</p> <p>Key Takeaways:</p> <ul style="list-style-type: none"> • Celebrated the legacy of the institution's founder. • Provided a platform for career exploration through a dedicated Career Drive. • Facilitated valuable networking opportunities for alumni. • Showcased the growth and transformation of the institution. • Offered insightful discussions and career guidance. <p>This summary highlights the key aspects of the event, emphasizing its significance for both alumni and the institution as a whole.</p>

Description (min 250 to max 800 words)*	<p>Radiation plays a crucial role in various fields, including healthcare, research, and industry. However, exposure to radiation poses significant risks if not properly managed. This alumnus talk aims to shed light on the potential hazards associated with radiation, the safety measures to mitigate risks, and advancements in radiation protection.</p> <p>Radiation hazards arise from ionizing and non-ionizing radiation sources, with ionizing radiation being more harmful due to its ability to damage biological tissues and DNA. Exposure to high levels of radiation can lead to acute effects such as radiation burns and sickness, while prolonged exposure increases the risk of chronic diseases, including cancer. Professionals working in radiology, nuclear medicine, and industrial settings must adhere to strict safety protocols to minimize exposure.</p> <p>This session will provide valuable insights into radiation safety guidelines, regulatory frameworks, and protective measures such as shielding, monitoring, and proper handling of radioactive materials. Additionally, it will highlight the latest technological advancements that enhance radiation safety in various industries.</p>

	<p>Alumni working in pharmaceutical, healthcare, and research sectors will benefit from this discussion, gaining knowledge on best practices for radiation protection in their respective fields. The talk will also serve as a platform for networking, knowledge sharing, and career guidance for students and professionals interested in radiation-related domains.</p> <p>Join us for an engaging session to explore the significance of radiation safety, understand its impact, and stay updated on evolving protective measures in this critical field.</p>

Description (min 250 to max 800 words)*	<p>The Cross-Border Legal Practice: International Law in Practice panel delved into the complexities of practicing law across multiple jurisdictions, focusing on issues like international contracts, conflict resolution, and global legal cooperation. As businesses and individuals increasingly operate in a globalized world, lawyers must navigate the challenges posed by varying legal systems and regulatory environments. The panelists, comprising seasoned international lawyers, discussed the importance of understanding local laws and how they intersect with international treaties and conventions.</p> <p>A key theme was international contracts, which often involve multiple parties from different countries. The panel emphasized the importance of drafting clear, enforceable contracts that account for the differences in legal systems, particularly when it comes to dispute resolution mechanisms. Lawyers must often include arbitration clauses or choice-of-law provisions to specify which legal system governs the agreement and how disputes will be resolved. The panelists also highlighted the importance of considering cultural differences when negotiating contracts and how these differences can impact both the content and enforcement of agreements.</p> <p>The discussion also touched on the increasing role of alternative dispute resolution (ADR) in cross-border legal practice. While traditional litigation can be costly and time-consuming, arbitration, mediation, and other ADR mechanisms offer more flexible and efficient solutions. The panelists noted that international legal bodies like the International Chamber of Commerce (ICC) provide frameworks for resolving disputes between parties from different jurisdictions.</p> <p>The session concluded by stressing the need for legal professionals in the international arena to be not only knowledgeable about various legal systems but also skilled in managing the diplomatic and business aspects of cross-border transactions. As global business transactions become more complex, the demand for cross-border legal expertise will continue to rise, requiring lawyers to stay informed about international developments and be adaptable in their approach.</p>

Description (min 250 to max 800 words)*

The Student Council of School of Design successfully organized *Design Dialogues*, an engaging series of panel discussions and guest talks, aimed at enriching students' understanding of contemporary design practices. The event featured prominent speakers, including alumni and industry leaders, who shared their insights on topics like "*The Future of Design Careers*" and "*Breaking Creative Blocks*."

The Student Council meticulously planned every aspect, from curating relevant themes to coordinating with speakers and designing promotional materials. They ensured seamless execution by forming dedicated teams for logistics, hospitality, and event moderation.

Interactive Q&A sessions allowed students to voice their queries, fostering meaningful discussions. A networking zone was set up post-event, providing opportunities for students to connect with professionals. The event received overwhelmingly positive feedback, with students appreciating the Council's initiative and effort in creating an inspirational learning platform that bridged academics and industry.

<p>Description (min 250 to max 800 words)*</p>	<p>Alumni Meet: A Bridge to Success</p> <p>On January 27, 2023, Sushant School of Art and Architecture hosted a successful Alumni Meet focused on Internship & Placements. The event brought together a diverse group of alumni, current students, and industry professionals for a productive afternoon of networking and career exploration.</p> <p>The primary objective of the meet was to connect current students with</p>

	<p>successful alumni who could provide valuable insights and guidance on internship and placement opportunities. The event featured a series of interactive sessions where alumni shared their career journeys, offered practical advice on resume building, interview preparation, and job search strategies.</p> <p>A key highlight of the event was the opportunity for students to network directly with alumni working in various industries. This facilitated valuable peer-to-peer learning and allowed students to gain firsthand knowledge about different career paths and the skills required to succeed in today's competitive job market.</p> <p>The Alumni Meet proved to be a valuable resource for students seeking to gain a competitive edge in their career pursuits. The event fostered a strong sense of community and provided a valuable platform for alumni to give back to their alma mater by mentoring and guiding the next generation of graduates.</p> <p>Key Takeaways:</p> <ul style="list-style-type: none"> • Provided valuable insights and guidance on internship and placement opportunities. • Facilitated networking between students and successful alumni. • Offered practical advice on resume building, interview preparation, and job search strategies. • Fostered a strong sense of community and alumni engagement. <p>This summary captures the essence of the Alumni Meet, emphasizing its role in bridging the gap between students and the professional world.</p>

Description (min 250 to max 800 words)*	<p>The Legal Writing and Advocacy in the Modern World workshop focused on essential skills for effective legal communication, such as persuasive legal writing, oral advocacy, and the importance of clarity and precision in legal arguments. The session began with an exploration of the critical role that writing skills play in legal practice, where even minor errors in drafting can lead to significant legal consequences. The speakers emphasized the importance of structure in legal writing—ensuring that documents are not only clear and concise but also logically organized to present arguments persuasively.</p> <p>A central theme was the art of persuasive writing, which is particularly important for legal briefs, motions, and court submissions. The workshop offered practical tips on how to craft compelling arguments that are grounded in the facts of the case while adhering to legal principles. Participants were introduced to techniques for improving the flow and persuasiveness of legal arguments, such as using analogies, emphasizing key points, and addressing potential counterarguments. The speakers also highlighted the importance of tailoring legal writing to the audience, whether it be a judge, client, or opposing counsel.</p> <p>The session also included a discussion on the growing importance of oral advocacy in modern legal practice. Lawyers must be prepared not only to write compelling arguments but also to deliver them effectively in court. The speakers provided guidance on how to present arguments with confidence, clarity, and persuasiveness during hearings and trials. They also discussed the role of non-verbal communication, including body language and tone of voice, in influencing the outcome of a case.</p> <p>Finally, the workshop emphasized the value of clear communication in legal practice. Whether in writing or speaking, legal professionals must ensure that their arguments are easily understood by those who may not have a deep understanding of the law. The session concluded with a call to develop strong communication skills throughout one's legal career, as these abilities are fundamental to success in both advocacy and client relations.</p>

<p>Description (min 250 to max 800 words)*</p>	<p>The field of cardiac care has witnessed remarkable advancements over the years, revolutionizing the diagnosis, treatment, and management of cardiovascular diseases. With cutting-edge technologies, innovative treatment approaches, and improved preventive strategies, cardiac healthcare continues to evolve, enhancing patient outcomes and quality of life.</p> <p>This alumni talk, organized by the School of Health Sciences, Sushant University, aims to provide a comprehensive understanding of recent developments in cardiac care. Cardiovascular diseases (CVDs) remain a leading cause of mortality worldwide, making it essential for healthcare professionals, researchers, and students to stay updated with the latest advancements in this field.</p> <p>One of the key breakthroughs in cardiac care is the integration of artificial intelligence (AI) and machine learning in diagnostics. AI-driven tools are enhancing early detection of heart diseases by analyzing medical imaging, ECG patterns, and patient data with exceptional accuracy. Additionally, minimally invasive procedures such as transcatheter aortic valve replacement</p>

	<p>(TAVR) and robotic-assisted cardiac surgeries have significantly reduced recovery time and improved surgical success rates.</p> <p>Pharmacological advancements, including next-generation anticoagulants, cholesterol-lowering drugs, and gene-based therapies, have also transformed cardiac treatment, providing more effective and personalized approaches to patient care. Moreover, innovations in wearable technology, such as smartwatches and cardiac monitors, allow real-time tracking of heart health, enabling early intervention and better disease management.</p> <p>This session will serve as an excellent platform for alumni to engage in knowledge-sharing, discuss emerging trends in cardiac healthcare, and explore career opportunities in cardiology and related fields. Join us for an insightful discussion on the future of cardiac care and its impact on global healthcare.</p>

Description (min 250 to max 800 words)*	<p>Alumni Talks: Sketching in Architecture - A Glimpse into Design Thinking</p> <p>On March 24, 2023, Sushant School of Art and Architecture hosted a captivating "Alumni Talks: Sketching in Architecture" session. The event brought together a distinguished panel of alumni architects who shared their insights and experiences on the crucial role of sketching in the</p>

	<p>architectural design process.</p> <p>The session began with engaging presentations by the alumni panelists, each showcasing their unique sketching styles and approaches. They emphasized the importance of sketching as a fundamental tool for ideation, communication, and problem-solving in architecture. The panelists highlighted how sketching allows architects to explore design concepts, experiment with forms, and communicate their ideas effectively to clients and collaborators.</p> <p>The interactive discussion that followed provided a valuable platform for current students to engage with the alumni and gain practical insights. The panelists addressed a range of questions from the audience, offering valuable advice on developing sketching skills, finding inspiration, and integrating sketching into their design workflow.</p> <p>The "Alumni Talks: Sketching in Architecture" session proved to be an enriching experience for all attendees. It showcased the enduring value of sketching as a core skill for aspiring architects and inspired students to further develop their creative and expressive abilities.</p> <p>Key Takeaways:</p> <ul style="list-style-type: none"> • Emphasized the crucial role of sketching in the architectural design process. • Showcased diverse sketching styles and approaches. • Provided valuable insights on developing sketching skills and integrating them into design workflows. • Fostered a valuable dialogue between students and successful alumni architects. <p>This summary effectively captures the essence of the "Alumni Talks" event, highlighting the key takeaways and its significance for aspiring architects.</p>

Description (min 250 to max 800 words)*	<p>Alumni Talk on "Bridging Medicine and Health Systems"</p> <p>The School of Health Sciences, Sushant University, Gurugram is organizing an insightful Alumni Talk on "Bridging Medicine and Health Systems". This event aims to provide students with valuable insights from distinguished alumni who have successfully integrated their academic knowledge with practical experience in the healthcare sector, particularly in the field of cardiovascular care and medicine.</p> <p>The session will focus on the evolving landscape of healthcare systems and the critical role that medical advancements play in improving cardiovascular care. Alumni speakers, with their extensive experience in clinical practice, healthcare management, and medical research, will share their professional journeys. They will highlight the challenges faced during their transition from academic learning to real-world practice, offering practical advice on overcoming these obstacles.</p> <p>Key topics to be covered include innovations in cardiovascular treatment, the impact of emerging medical technologies, and</p>

	<p>strategies for ensuring patient safety and effective healthcare delivery. The speakers will also discuss how healthcare systems are adapting to meet the growing demands of cardiovascular care, emphasizing the importance of multidisciplinary collaboration and evidence-based practice.</p> <p>This interactive session will offer students an excellent opportunity to engage with alumni, seek guidance on career development, and understand the practical applications of their academic studies. Students will also gain valuable insights into the skills required to thrive in the dynamic healthcare environment, particularly in fields related to medicine and heart health.</p> <p>In addition to gaining industry knowledge, attendees will have the chance to network with alumni and peers, fostering connections that can inspire future learning and professional growth.</p> <p>The Alumni Talk on "Bridging Medicine and Health Systems" promises to be an enriching experience for all participants, equipping them with the knowledge and inspiration needed to excel in healthcare practice and contribute meaningfully to improving patient outcomes.</p> <p>We encourage all students to participate actively and take advantage of this opportunity to learn from experienced professionals in the field.</p>

Description (min 250 to max 800 words)*	On 18 th August, 2023, school of engineering and technology invited one of our alumni Ms. Sonali Chawla as guest speaker, during the 3 days orientation program offered for the fresh admitted students of B. Tech and BCA programs. This occasion presented an exceptional chance for our students to gain first-hand knowledge about her transition from academia to the corporate world. Sonali shared her experiences as a student and the challenges in the corporate world. Students showed keen interest and asked many questions from her. Many students exchanged their contact numbers to stay in touch with sonali in future.

Description (min 250 to max 800 words)*	<p>On September 4, 2023, an Alumni Meet was held, combining the celebration of Founder's Day with a dedicated Career Drive. The event ran from 9:00 AM to 5:00 PM and aimed to foster a strong sense of community among alumni while providing valuable career guidance to current students.</p> <p>The day began with honoring the institution's founder and</p>

	<p>commemorating their significant contributions to the institution's growth and success. This was followed by a vibrant Career Drive where leading companies showcased exciting employment opportunities. Students had the chance to network with recruiters, explore potential career paths, and gain valuable insights into the job market through interactive sessions and workshops.</p> <p>The event also provided a platform for alumni to reconnect with their alma mater and fellow graduates. Many enjoyed a campus tour, reminiscing about their time as students and witnessing the institution's evolution. Engaging discussions with esteemed alumni and industry experts offered valuable career advice and inspired students as they embark on their professional journeys.</p> <p>The Alumni Meet proved to be a resounding success, fostering a strong sense of community and providing a valuable platform for both alumni and current students. It served as a testament to the enduring legacy of the institution's founder and the bright future that lies ahead for its graduates.</p> <p>Key Takeaways:</p> <ul style="list-style-type: none"> • Celebrated the legacy of the institution's founder. • Provided a platform for career exploration through a dedicated Career Drive. • Facilitated valuable networking opportunities for alumni. • Showcased the growth and transformation of the institution. • Offered insightful discussions and career guidance.

Description (min 250 to max 800 words)*	<p>The Student Council of School of Design organized a memorable farewell event for the graduating batch of 2019, filled with nostalgia and celebration. The evening was marked by heartfelt speeches, where students and faculty shared fond memories and words of encouragement for the future. A series of performances, including dances and musical acts, showcased the diverse talents of the students and added a lively spirit to the occasion. The event also featured a photo booth with fun props, allowing graduates to capture these final moments together. The farewell was a fitting tribute to the journey of the batch of 2019, celebrating their achievements and the strong bonds formed over the years.</p>

Description (min 250 to max 800 words)*

Vivek Krishna is a CEO of India's fastest growing profitable Ayurvedic men's sexual wellness brand that serves both the needy and the greedy. Sukham is a D2C brand that provides safe and result oriented Ayurvedic products that are backed by science and are manufactured using proprietary in house herb processing methodologies and techniques. Vivek controls sourcing, manufacturing, packaging and distribution to provide the customers with standardized quality products but with a personalized experience. On 4th October 2023, School of engineering gave our students a platform to meet Mr. Vivek and exchange their queries and thoughts.

Description (min 250 to max 800 words)*	<p>The field of medical laboratory science has undergone significant advancements in recent years, transforming the way diseases are diagnosed, monitored, and treated. With the integration of cutting-edge technology, automation, and molecular diagnostics, medical laboratories now play a crucial role in improving healthcare outcomes.</p> <p>The Alumni Talk on "Advances in Medical Lab Techniques", organized by the School of Health Sciences, Sushant University, aims to highlight recent innovations and best practices in the field. Medical laboratory techniques have evolved with the introduction of automation, artificial intelligence (AI), and point-of-care testing, making diagnostic processes faster, more accurate, and efficient.</p> <p>One of the key advancements in this domain is molecular diagnostics, which enables the early detection of infectious diseases, genetic disorders, and cancers through techniques such as polymerase chain reaction (PCR) and next-generation sequencing (NGS). These methods provide precise and rapid</p>

	<p>results, aiding in early intervention and personalized treatment approaches.</p> <p>Another significant development is the use of automation and robotics in clinical laboratories. Automated analyzers and robotic sample handlers have improved workflow efficiency, reducing human error and enhancing the reliability of test results. AI-driven diagnostic tools are also transforming laboratory medicine by assisting in image analysis, predictive diagnostics, and data interpretation.</p> <p>Furthermore, point-of-care testing (POCT) has revolutionized patient care by enabling real-time diagnosis outside traditional lab settings. Devices such as portable blood analyzers and rapid test kits have made it easier to diagnose conditions like diabetes, cardiovascular diseases, and infections at the patient's bedside.</p> <p>This session will provide alumni, students, and professionals with insights into these advancements, offering a platform for discussion on emerging trends, career opportunities, and the future of medical laboratory sciences. Join us for an engaging discussion on how technology is shaping the future of laboratory diagnostics and improving healthcare delivery.</p>

<p>(Geotag) Photograph-2</p> <p>Description (min 250 to max 800 words)*</p>	<p>The Impact of Supreme Court Decisions on Public Policy lecture provided an insightful look into the significant role that Supreme Court decisions play in shaping public policy and society. The session began by discussing some of the most high-profile Supreme Court cases in recent years and their lasting effects on laws and regulations across the United States.</p> <p>One key case discussed was Obergefell v. Hodges, which legalized same-sex marriage nationwide and demonstrated how Supreme Court rulings can profoundly alter social policy. The lecture explored how the Court's interpretation of the Constitution impacts broader issues, from civil rights to healthcare and education. Speakers emphasized that Supreme Court decisions can set legal precedents, influencing legislative action and guiding lower courts in future cases.</p> <p>The session also explored the political implications of Supreme Court rulings, particularly in an era of heightened polarization. Decisions on topics like abortion rights, gun control, and voting rights have far-reaching consequences for public policy and often spark national debates. The lecture noted that the composition of the Court, with its appointed justices, plays a critical role in determining the direction of public policy. The panelists discussed the growing trend of judicial activism—where the Court takes an active role in shaping policy—and the potential risks and benefits of such an approach. Finally, the session concluded by stressing the importance of legal analysis and the Court's interpretive role in ensuring that the Constitution remains relevant in addressing contemporary societal challenges.</p>

Description (min
250 to max 800
words)*

The **Alternative Dispute Resolution (ADR) Techniques** workshop explored the growing importance of ADR methods such as **mediation**, **arbitration**, and **negotiation** in resolving disputes outside the traditional court system. ADR offers parties an alternative to the often lengthy, expensive, and adversarial nature of litigation, making it an increasingly popular choice for resolving conflicts.

One of the key ADR methods discussed was **mediation**, in which a neutral third party helps disputing parties reach a mutually acceptable agreement. Mediation is a collaborative process that focuses on preserving relationships between parties, making it especially useful in family law and business disputes. The workshop emphasized that mediators do not make decisions but facilitate discussions, guiding the parties toward a resolution. The benefits of mediation include confidentiality, flexibility, and the ability to avoid the stress of a trial.

Another important ADR method covered was **arbitration**, which involves a neutral third party who hears both sides of the dispute and makes a binding decision. Unlike mediation, arbitration results in a final decision that is legally enforceable. The workshop explored the various forms of arbitration, such as **binding** and **non-binding arbitration**, and highlighted the advantages of arbitration, including its efficiency, privacy, and ability to handle complex matters with industry-specific expertise.

The session also touched on **online dispute resolution (ODR)**, a rapidly growing field that uses technology to facilitate ADR processes remotely. With the rise of digital platforms, parties can engage in mediation or arbitration via online tools, making ADR more accessible and efficient for individuals and businesses worldwide. This is particularly beneficial in cross-border disputes where parties are in different geographic locations.

	Overall, the workshop emphasized that ADR provides legal professionals with valuable tools to resolve disputes efficiently and amicably, reducing the strain on traditional courts while offering cost-effective solutions for clients.

Description (min 250 to max 800 words)*	<p>The Alumni Meet: Internship & Placements Drive, held on February 2, 2024, from 2:00 PM to 4:00 PM at Sushant School of Art and Architecture, provided an excellent platform for students to connect with alumni and industry professionals. The event was focused on offering valuable guidance regarding internships and job placements, essential for students preparing to enter the competitive field of architecture.</p>

	<p>The session featured a panel of alumni who shared their personal experiences in securing internships and transitioning into full-time positions in the architecture industry. They emphasized the significance of internships as an opportunity to gain practical experience, develop skills, and understand the realities of working in architecture firms. Alumni spoke about the challenges and rewards of their early career experiences, offering advice on how students could make the most out of their internships by being proactive, curious, and adaptable.</p> <p>The Placements Drive component allowed students to engage with professionals from various architecture firms. Alumni shared essential tips for building strong portfolios, preparing for interviews, and networking within the industry. They discussed how students can differentiate themselves in a crowded job market by staying updated with new trends in architecture, such as sustainability, digital tools, and urban design.</p> <p>Students had the chance to ask questions, seek personalized advice, and learn from the alumni's success stories and challenges. The event fostered a supportive environment where students could gain practical insights on navigating the transition from academic life to professional practice.</p> <p>Overall, the Internship & Placements Drive was a productive and informative event that provided students with the tools and knowledge they need to secure internships and launch successful careers in architecture.</p>

<p>Description (min 250 to max 800 words)*</p>	<p>The Alumni Meet on "Modern Approaches to Mental Health: Insights for Alumni", organized by the School of Health Sciences, Sushant University, aims to explore the latest advancements in mental health care, including research, therapies, and support systems that enhance emotional well-being. This session will provide a platform for alumni, students, and professionals to exchange knowledge, share experiences, and discuss career opportunities in the field of mental health.</p> <p>Mental health has become a critical aspect of overall well-being, influencing emotional, psychological, and social functioning. With rising awareness and evolving treatment strategies, modern approaches to mental health focus on early intervention, holistic care, and innovative therapeutic techniques.</p> <p>One of the key advancements in modern mental health care is the integration of technology-driven solutions such as artificial intelligence (AI)-based mental health apps, teletherapy, and virtual reality (VR) therapy. These tools have made mental health support more accessible, enabling individuals to seek help remotely and receive personalized interventions.</p>

	<p>Another significant shift is the emphasis on holistic and preventive mental health care. Approaches such as mindfulness, cognitive behavioral therapy (CBT), and stress management techniques have gained popularity in addressing mental health concerns. Moreover, workplaces and educational institutions are increasingly implementing mental wellness programs to foster a supportive environment.</p> <p>The role of community-based mental health initiatives has also expanded, ensuring that mental health services reach underserved populations. Peer support groups, crisis intervention hotlines, and social awareness campaigns are breaking stigmas and encouraging individuals to seek timely help.</p> <p>This session will highlight these modern approaches, providing valuable insights into how mental health care is evolving. Join us to gain a deeper understanding of mental health innovations, explore career pathways, and contribute to the ongoing dialogue on mental well-being in today's world.</p>

Description (min 250 to max 800 words)*	<p>The Alumni Talks: Robotics in Architecture, held on March 29, 2024, from 2:00 PM to 4:00 PM at Sushant School of Art and Architecture, provided students with an exciting glimpse into the future of architecture. The session explored the innovative intersection of robotics and architectural design, a rapidly growing field that is transforming the way buildings are designed, constructed, and maintained.</p> <p>Alumni who are working at the forefront of this technological revolution</p>

	<p>shared their experiences and insights on the role of robotics in architecture. They discussed how robots are being utilized in the design process, from automated construction methods and 3D printing to robotic arms that assist in material fabrication. The session also covered how robotics is helping architects push the boundaries of traditional construction, allowing for more intricate, efficient, and sustainable design solutions.</p> <p>Students learned about the wide range of possibilities that robotics offers, including its potential for precision, speed, and cost-effectiveness in building projects. Alumni highlighted real-world examples where robotics has been successfully integrated into architecture, demonstrating how these technologies are reshaping architectural practices. The use of robots in construction also helps with tasks that are either too complex or dangerous for humans, making the process safer and more efficient.</p> <p>In addition to discussing the technical aspects, alumni also emphasized the growing demand for architects with skills in robotics, automation, and digital fabrication. They encouraged students to explore these fields and consider incorporating robotics into their design processes.</p> <p>The Alumni Talks session was an inspiring and thought-provoking event, giving students the tools and knowledge to stay ahead in the ever-evolving architectural landscape. It emphasized the importance of embracing innovation and technology in the future of architecture.</p>

Description (min 250 to max 800 words)*	<p>The Legal Implications of Intellectual Property in the Digital Age session focused on how intellectual property (IP) law is adapting to challenges presented by digital content, online piracy, and the rapid evolution of technology. Intellectual property, which includes patents, trademarks, copyrights, and trade secrets, plays a central role in protecting the creations of innovators and artists. However, the digital revolution has introduced new challenges for IP protection, particularly with the rise of online piracy and content sharing platforms.</p> <p>A key issue discussed was the enforcement of copyrights in the digital age. The widespread availability of digital content, such as music, movies, and software, has made it easier for individuals to copy and distribute works without authorization. Legal experts discussed how the Digital Millennium Copyright Act (DMCA) in the U.S. and similar international laws attempt to address these challenges by providing mechanisms to remove infringing content from websites. However, enforcement remains difficult, especially on global platforms where jurisdictional issues arise.</p> <p>The session also covered the evolving nature of patent law, particularly in the tech industry. As new technologies emerge, the protection of software patents, algorithms, and biotechnology innovations becomes increasingly complex. Legal professionals discussed the need for clarity in patent rights and the impact of patent trolls, where entities acquire patents to profit from litigation rather than innovation.</p> <p>Additionally, the lecture examined the growing role of trademarks in the digital marketplace, with the rise of online platforms like Amazon and eBay leading to concerns over brand protection. With products being sold by third-party vendors, the risk of counterfeit goods has increased, raising questions about liability and consumer protection.</p> <p>In conclusion, the session emphasized the need for constant adaptation of IP law to keep pace with technological advances and ensure that creators' rights are adequately protected in the digital environment.</p>
